## Vision and Mission of KLE Technological University

### Vision

KLE Technological University will be a national leader in Higher Education—recognised globally for innovative culture, outstanding student experience, research excellence and social impact.

### Mission

KLE Technological University is dedicated to teaching that meets highest standards of excellence, generation and application of new knowledge through research and creative endeavours.

The three-fold mission of the University is:

- To offer undergraduate and post-graduate programs with engaged and experiential learning environment enriched by high quality instruction that prepares students to succeed in their lives and professional careers.
- To enable and grow disciplinary and inter-disciplinary areas of research that build on present strengths and future opportunities aligning with areas of national strategic importance and priority.
- To actively engage in the Socio-economic development of the region by contributing our expertise, experience and leadership, to enhance competitiveness and quality of life.

As a unified community of faculty, staff and students, we work together with the spirit of collaboration and partnership to accomplish our mission.

### **Vision and Mission Statements of the Department**

#### **Vision**

To be a premier center of integrated computer application studies and research towards developing competent professionals equipped with cutting-edge technological skills and knowledge to provide sustainable solutions for the evolving needs of society.

#### **Mission**

1. To provide high quality education through outstanding teaching and industry relevant curricula to enable students to accomplish a successful career in Computer Science and applications.
2. To contribute to advancing knowledge in both fundamentals and applied areas of Computer Science.
3. To provide a scholarly environment that enables faculty and students to achieve academic and professional growth.
4. To provide valuable services to society through education, research, and entrepreneurship, in the field of Computer Science and applications.

## Program Educational Objectives/Program Outcomes and Program-Specific Objectives

Program Educational Objectives -PEO's
1. Have a strong foundation and ability to apply knowledge of Computer Science, Mathematics, and Humanities to conceive, analyse, design, and implement IT solutions to problems in real-life applications.
2. Have a comprehensive background to practice Software Engineering Principles in various domains that require software architecture, design, development, and testing practices.
3. Understand the professional and ethical obligations of a software engineer towards society and the need for lifelong learning.
4. Have the ability to participate in multi-disciplinary teams using ICT effectively.
Program Outcomes-PO's
1. <b>Computational knowledge:</b> Apply knowledge of computing fundamentals, computing specialization, mathematics, and domain knowledge appropriate for the computing specialization to the abstraction and conceptualization of computing models from defined problems and requirements.
2. <b>Problem analysis:</b> Identify, formulate research literature, and solve complex computing problems, reaching substantiated conclusions using fundamental principles of mathematics, computing sciences, and relevant domain disciplines.
3. <b>Design/Development of Solutions:</b> Design and evaluate solutions for complex computing problems, and design and evaluate systems, components, or processes that meet specified needs with appropriate consideration for public health and safety, cultural, societal, and environmental considerations.
4. <b>Conduct investigations of complex problems:</b> Use research-based knowledge and research methods, including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5. <b>Modern tool usage:</b> Create, select, adapt, and apply appropriate techniques, resources, and modern computing tools to complex computing activities, with an understanding of the limitations.
6. <b>Professional Ethics:</b> Understand and commit to professional ethics and cyber regulations, responsibilities, and norms of professional computing practice.

7. <b>Life-long learning:</b> Recognize the need, and have the ability, to engage in independent learning for continual development as a computing professional.
8. <b>Project management and finance:</b> Demonstrate knowledge and understanding of the computing and management principles and apply these to one's work as a member and leader in a team, to manage projects and in multidisciplinary environments.
9. <b>Communication Efficacy:</b> Communicate effectively with the computing community, and with society at large, about complex computing activities by being able to comprehend and write effective reports, design documentation, make effective presentations and give and understand instructions clearly.
10. <b>Societal and Environmental Concern:</b> Understand and assess societal, environmental, health, safety, legal, and cultural issues within local and global contexts and the consequential responsibilities relevant to professional computing practice.
11. <b>Individual and teamwork:</b> Function effectively as an individual and as a member or leader in diverse teams and multi-disciplinary environments.
12. <b>Innovation and Entrepreneurship:</b> Identify a timely opportunity and use of innovation to pursue that opportunity to create value and wealth for the betterment of the individual and society at large.
<i>Program Specific Objectives -PSO's</i>
1. <b>IT skills:</b> An ability and capacity acquired through deliberate, systematic, and sustained effort to carry out complex IT activities involving innovative ideas, technical skills, and interpersonal skills.
2. <b>Professional Competency:</b> Apply computing concepts, skills, and processes to produce a product/project in the domain, demonstrating professional knowledge and attitude.

### Curriculum Structure-Overall 2024-26

Course with course code	I	II	III	IV	Elective 1 & 2	Elective 3 (MOOC)
	Data Structures using C 24ECAC701 (3-0-1.5)	OOPS using Java 24ECAC705 (3-0-0)	Machine Learning 24ECAC801 (3-0-1)	Capstone Project Work 24ECAP802 (0-0-18)	Linux Administration 23ECAE801 (3-0-0)	Modern Web Development Framework 23ECAP804 (0-0-2)
	Database Management System 24ECAC702 (3-0-1.5)	Data Mining 24ECAC706 (3-0-1)	Big Data Analytics 24ECAC802 (3-0-1)	Elective-3 (MOOC) 23ECAP8XX (0-0-2)	DevOps 23ECAE802 (2-0-1)	Data Modeling with SQL and NoSQL Databases 23ECAP805 (0-0-2)
	Computer Networks 24ECAC703 (3-0-1)	Software Engineering 24ECAC707 (3-0-0)	Advanced JAVA Programming 24ECAC804 (3-0-1)		User Interface Design 23ECAE803 (3-0-0)	Software Testing and Quality Assurance Practices 23ECAP806 (0-0-2)
	Operating Systems 24ECAC704 (3-0-1)	Cloud Computing 24ECAC708 (3-0-1)	Elective-1 23ECAE8XX (3-0-0)		Cyber Security 23ECAE804 (3-0-0)	Applications of Artificial Intelligence 23ECAP807 (0-0-2)
	Mathematical Thinking & Logical Reasoning 15EHSC701 (3-0-0)	Design and Analysis of Algorithms 24ECAC709 (3-0-1)	Elective-2 23ECAE8XX (3-0-0)		C# Programming with .Net 23ECAE806 (3-0-0)	Applied Data Science and Analytics 23ECAP808 (0-0-2)
	Web Technology 23ECAP704 (0-0-2)	Java Lab 24ECAP701 (0-0-2)	Mobile Application Development 24ECAP801 (0-0-2)		Statistical Foundation for Data Science 23ECAE807 (3-0-0)	Cloud Native Systems and Continuous Delivery 23ECAP809 (0-0-2)
		Mini Project-1 24ECAP702 (0-0-2)	Mini Project-2 23ECAP802 (0-0-2)		Full Stack Development with MERN 23ECAE808 (2-0-1)	Network Security and Ethical Hacking 23ECAP810 (0-0-2)
	Critical Thinking and Problem-Solving Skills 24EHSC701 (1-0-0)	Communication and Leadership Skills 24EHSC702 (1-0-0)			Natural Language Processing & Gen-AI 23ECAE817 (2-0-2)	Building Blockchain Applications 23ECAP811 (0-0-2)
	<b>Credits</b>	<b>23</b>	<b>22</b>	<b>20</b>

### List of Program Electives-3 IV-Semester

Sr. No	Name of the Course	Course Code
1.	Modern Web Development Framework	23ECAP804
2.	Data Modeling with SQL and NoSQL Databases	23ECAP805
3.	Software Testing and Quality Assurance Practices	23ECAP806
4.	Applications of Artificial Intelligence	23ECAP807
5.	Applied Data Science and Analytics	23ECAP808
6.	Cloud Native Systems and Continuous Delivery	23ECAP809
7.	Network Security and Ethical Hacking	23ECAP810
8.	Building Blockchain Applications	23ECAP811

## Curriculum Content- Course wise

### Semester - I

<b>Program: Master of Computer Applications</b>		<b>Semester: I</b>
<b>Course Title: Data Structures using C</b>		<b>Course Code: 24ECAC701</b>
<b>L-T-P : 3-0-1.5</b>	<b>Credits: 4.5</b>	<b>Contact Hours: 6 hrs/week</b>
<b>ISA Marks: 50</b>	<b>ESA Marks:50</b>	<b>Total Marks: 100</b>
<b>Teaching Hours: 40</b>	<b>Practical:36</b>	<b>Examination Duration: 3 Hrs</b>
<b>Unit I</b>		
<b>1</b>	<b>Overview of C</b> History of C, Features of C, Why to learn C Programming, Basic structure of a C program, Compilation Process in C, Compile time Vs Runtime, Variables, Constants, ASCII value, Data Types, Storage Classes, Operators, Decision Making, Loops, Functions, Scope Rules, Passing arrays to functions, Passing structures to Functions, Character arrays, Pointers, malloc(), calloc(), realloc() and free() functions in C	<b>8 Hrs</b>
<b>2</b>	<b>Stacks</b> Definition and examples, Primitive operations, Example, Representing stacks in C, Implementing the pop operation, Testing for exceptional conditions, Implementing the push operation, Examples for infix, postfix, and prefix expressions, Basic definition and examples, Program to evaluate a postfix expression, Converting an expression from infix to postfix, Program to convert an expression from infix to postfix.	<b>4 Hrs</b>
<b>3</b>	<b>Recursion</b> Recursive definition and processes, Factorial function, Multiplication of natural numbers, Fibonacci sequence, Binary search, Properties of recursive definition or algorithm. Recursion in C, Factorial in C, Fibonacci numbers in C, Binary search in C, Towers of Hanoi problem	<b>4 Hrs</b>
<b>Unit II</b>		
<b>4</b>	<b>Queues and Lists</b> The queue and its sequential representation, C implementation of queues, Insert operation, Priority queue, and array implementation of a priority queue. Linked lists, Inserting and removing nodes from a list, Linked implementation of stacks, get node and free node operations, Linked implementation of queues, Linked list as a data structure, Example of list operations, Header nodes, Lists in C, Array implementation of lists, Limitations of array implementation, allocating and freeing dynamic variables, Linked lists using dynamic variables, Queues as lists in C, Examples of list operations in C, Non integer and non- homogeneous lists, Other list structures: Circular lists, Stack as a circular list, Queue as a circular list, Primitive operations on circular lists, doubly linked lists	<b>8 Hrs</b>
<b>5</b>	<b>Trees and Graphs</b>	<b>8 Hrs</b>

	Binary trees, operations on binary trees, Applications of binary trees, Binary tree representation, Node representation of binary tree, Internal and external nodes, Implicit array representation of binary trees, Choosing a binary tree representation, Binary tree traversal in C, Threaded binary trees. Graphs: Definitions, Application of graphs, and C representation of graphs, Traversal methods for graphs, Depth first traversal, and Breadth first traversal.	
<b>Unit III</b>		
<b>6</b>	<b>Sorting</b> Bubble Sort, Quick Sort, Selection Sort, Tree Sorting: Binary Tree Sort, Heap Sort Insertion Sorts: Simple Insertion, Shell Sort, Address Calculation Sort, Merge and Radix Sort.	<b>4 Hrs</b>
<b>7</b>	<b>Searching</b> Basic Search Techniques: Algorithmic notation, Sequential searching, Searching an ordered table, Indexed sequential search, Binary search, Interpolation search, Tree searching: Inserting into a Binary Search Tree, Deleting from a Binary Search Tree, Hashing: Resolving hash clashes by open addressing, Choosing a hash function	<b>4 Hrs</b>
<b>Text Books :</b> <ol style="list-style-type: none"> <li>Yedidyah Langsam, Augenstein, M.J. and Tenenbaum, Data Structures using C and C++, Second Edition, Pearson Education Asia, 2006</li> </ol>		
<b>Reference Books:</b> <ol style="list-style-type: none"> <li>Weiss, M.A., Data Structures and Algorithm Analysis in C, 2, Pearson Education Asia, 1997</li> <li>Gilberg, R.F. and Forouzan, B.A. , Data Structures A Pseudo code Approach with C, 3, Reprint,Thomson Course Technology, 2005</li> <li>Reema Thareja, Data Structures using C , 2 nd Edition, 2014, Oxford University Press</li> </ol>		

## Evaluation Scheme

### In Semester Assessment (ISA)

Assessment	Marks
ISA	50
ESA	50
Total	100

### End Semester Assessment (ESA)

UNIT	8 Questions to be set of 20 Marks Each	Chapter Nos.	Instructions
I	3 Questions to be set of 20 Marks Each	1, 2, 3	Any 2 questions are to be answered
II	3 Questions to be set of 20 Marks Each	4, 5	Any 2 questions are to be answered

III	2 Questions to be set of 20 Marks Each	6, 7	Any 1 question is to be answered
-----	--	------	----------------------------------

## Lab Activities

Sl.no	Topics	Activity	Weightage
1	Arrays, functions, pointers, structures and dynamic memory allocation in C.	Program to demonstrate the following for a given set of elements: <ul style="list-style-type: none"> <li>• Array as a parameter</li> <li>• Structure as a parameter</li> <li>• Process of allocating memory during program execution</li> </ul>	10
2	Stack data structure	Program to illustrate implementation of stack using the following: <ul style="list-style-type: none"> <li>• Array</li> <li>• Structures</li> <li>• Functions and pointers.</li> </ul>	10
3	Applications of stack	Implement the two application of stack. <ul style="list-style-type: none"> <li>• Postfix expression evaluation</li> <li>• Conversion of Infix expression to Postfix expression</li> </ul>	10
4	Recursion	Write recursive functions in C program for the following: <ul style="list-style-type: none"> <li>• Simple recursive functions: Tower of Hanoi, factorial, Fibonacci series.</li> <li>• Reverse a stack using recursion</li> <li>• Sort a stack using recursion</li> </ul>	10
5	Queue and Circular Queue concepts	Program to illustrate implementation of queue and circular queue using array	10
6	Queue.	Implementation of queue using Linked list	10
7	Singly Linked List and Circular Linked List.	Implementation of singly and circular linked list.	10
8	Doubly Linked List	Perform all the operations on doubly linked list	10
9	Searching and sorting techniques.	Implementation of the following searching and sorting techniques: Linear search, binary search, insertion sort, heap sort, quick sort.	10
10	Tree and graph traversal	<ul style="list-style-type: none"> <li>• Construction and traversal of binary search tree</li> <li>• Program to demonstrate the graph traversal.</li> </ul>	10
<b>Total</b>			<b>100</b>

<b>Program: Master of Computer Applications</b>		<b>Semester: I</b>
<b>Course Title: Database Management System</b>		<b>Course Code: 24ECAC702</b>
<b>L-T-P : 3-0-1.5</b>	<b>Credits: 4.5</b>	<b>Contact Hours: 6 hrs/week</b>
<b>ISA Marks: 50</b>	<b>ESA Marks:50</b>	<b>Total Marks: 100</b>
<b>Teaching Hours: 40</b>	<b>Practical:36</b>	<b>Examination Duration:3 Hrs</b>
<b>Chapter No.</b>	<b>Content</b>	<b>Hrs</b>
<b>Unit I</b>		
<b>1</b>	<b>Introduction to Databases</b> Introduction; An example; Characteristics of Database approach; Actors on the scene; Workers behind the scene; Advantages of using DBMS approach; A brief history of database applications; When not to use a DBMS. Data models, schemas and instances; Three-schema Architecture and Data Independence; Database Languages and Interfaces.	<b>5 Hrs</b>
<b>2</b>	<b>Conceptual Data Modeling Using Entities and Relationships</b> Using High Level Conceptual Data Models for database Design; A Sample Database Application, Entity Types, Entity Sets, Attributes and Keys, Relationship Types, Relationship Sets, Roles and Structural Constraints, Weak Entity Types, Refining the ER Design for the COMPANY Database, ER Diagram, Naming Conventions and Design Issues, Relationships Higher than Two.	<b>5 Hrs</b>
<b>3</b>	<b>The Basic (Flat) Relational Model and Relational Algebra</b> Relational Model Concepts; Relational Model Constraints and Relational Database Schemas; Update Operations, Transactions and dealing with constraint violations. Unary Relational Operations: SELECT and PROJECT; Relational Algebra Operations from Set Theory; Binary Relational Operations: JOIN and DIVISION; Additional Relational Operations; Examples of Queries in Relational Algebra. Relational Database Design using ER-to-Relational Mapping.	<b>6 Hrs</b>
<b>Unit II</b>		
<b>4</b>	<b>SQL</b> SQL Data Definition and Data Types; Specifying Constraints in SQL; Basic Retrieval Queries in SQL; Insert, Delete and Update statements in SQL; More Complex SQL Retrieval Queries, Specifying Constraints as Assertions and Action as Triggers; Views (Virtual Tables) in SQL; Schema Change Statements in SQL; Database programming issues and techniques.	<b>7 Hrs</b>
<b>5</b>	<b>Database Design</b> Informal Design Guidelines for Relation Schemas; Functional Dependencies; Normal Forms Based on Primary Keys; General Definitions of Second and Third Normal Forms; Boyce-Codd Normal Form; Multivalued Dependencies and Fourth Normal Form; Join Dependencies and Fifth Normal Form.	<b>6 Hrs</b>
<b>6</b>	<b>Object and Object-Relational Databases</b> Overview of Object Database Concepts, Object-Relational Features: Object Database Extensions to SQL.	<b>3 Hrs</b>

## Unit III

<b>7</b>	<b>Foundations of Database Transaction Processing and Concurrency Control</b> Introduction to Transaction Processing; Transaction and System Concepts; Desirable Properties of Transactions; Characterizing Schedules Based on Recoverability; Characterizing Schedules Based on Serializability; Transaction Support in SQL. Two-Phase Locking Techniques for Concurrency control; Concurrency control based on Timestamp Ordering; Multiversion Concurrency control Techniques; Validation Concurrency Control Techniques; Granularity of Data Items & Multiple Granularity Locking; Using Locks for Concurrency Control in Indexes; Other Concurrency Control Issues.	<b>4 Hrs</b>
<b>8</b>	<b>Introduction to Database Recovery Protocols</b> Recovery Concepts, NO-UNDO/REDO Recovery Based on Deferred update; Recovery Techniques based on Immediate update; Shadow paging; The ARIES Recovery Algorithm; Recovery in Multi database Systems; Database Backup and Recovery from Catastrophic Failures.	<b>4 Hrs</b>
<b>Text Books :</b> <ol style="list-style-type: none"> <li>1. Ramez Elmasri, Shamkant B. Navathe, Database Systems, Sixth Edition, PEARSON, 2013</li> </ol>		
<b>Reference Books:</b> <ol style="list-style-type: none"> <li>1. Carlos Coronel, Steven Morris, Database Systems, Design, Implementation &amp; Management. Cengage 2017.</li> <li>2. Elmasri and Navathe, Fundamentals of Database Systems, Fifth Edition, Addison- W, 2007.</li> <li>3. #### End Semester Assessment (ESA)

UNIT	8 Questions to be set of 20 Marks Each	Chapter Nos.	Instructions
I	3 Questions to be set of 20 Marks Each	1, 2, 3	Any 2 questions are to be answered
II	3 Questions to be set of 20 Marks Each	4, 5,6	Any 2 questions are to be answered
III	2 Questions to be set of 20 Marks Each	7,8	Any 1 question is to be answered

### Lab Activities

Sl.no	Topics	Activity	Lab slots
1	<b>Introduction to Data Communications</b>	Overview of networks and layered communications	1
2	<b>Physical Layer:</b> Cable constructions and testing of different cable connectivity	1. Practice the cable construction for twisted pairs and fiber optics. 2. Test the configured cable connectivity.	1
3	<b>Physical Layer:</b> Analyzing the packet content using network monitoring tools	1. Understanding of packet capture using network interface. 2. Analyze the content of the packet using Wireshark tool correlated with OSI model.	2
4	<b>Physical Layer ,Data Link Layer:</b> Understanding of network devices and protocol simulation tool	1. Understanding of different network devices used for data communication. 2. Illustrate packet tracer simulation tool for design of the network.	2

5	<b>Data Link Layers:</b> ARQ Protocol implementation using C Program.	Implement the different supported ARQ protocols implementation using C Program.	2
6	<b>Network Layer:</b> Network Operations and troubleshooting	1. Outline the network properties and testing the network connectivity. 2. Explain the addressing protocols.	2
7	<b>Network Layer:</b>	Simulation and Implementation of Routing Protocols.	2

<b>Program: Master of Computer Applications</b>		<b>Semester: I</b>
<b>Course Title: Operating Systems</b>		<b>Course Code: 24ECAC704</b>
<b>L-T-P : 3-0-1</b>	<b>Credits: 4</b>	<b>Contact Hours: 5 hrs/week</b>
<b>ISA Marks: 50</b>	<b>ESA Marks:50</b>	<b>Total Marks: 100</b>
<b>Teaching Hours: 40</b>	<b>Practical:24</b>	<b>Examination Duration:3 Hrs</b>
<b>Unit I</b>		

<b>1</b>	<b>Introduction to Operating Systems, System structures</b> What operating systems do; Computer System organization; Computer System architecture; Operating System structure; Operating System operations; Resource Management; Security and Protection; Virtualization, Distributed systems, Kernel data structures, Computing environments; Operating System Services; User - Operating System interface; System calls; System services; Linkers and Loaders; Operating System design and implementation; Operating System structure; Building and Booting an Operating System, Operating System Debugging	<b>6 Hrs</b>
<b>2</b>	<b>Process Management</b> Process Concept, Process scheduling Operation on Processes, Interprocess communication, Multi-Threaded Programming: Overview; Multicore Programming, Multithreading models; Thread Libraries; Threading issues. CPU Scheduling: Basic concepts; Scheduling criteria Scheduling algorithms Multiple-Processor scheduling; Thread scheduling, Algorithm Evaluation.	<b>4 Hrs</b>
<b>3</b>	<b>Process Synchronization</b> Synchronization: The Critical section problem; Peterson's solution; Synchronization hardware; Semaphores; Classical problems of synchronization; Monitors	<b>6 Hrs</b>
<b>Unit II</b>		
<b>4</b>	<b>Deadlocks</b> Deadlocks: System model; Deadlock in Multithreaded application, Deadlock characterization; methods for handling deadlocks; Deadlock prevention; Deadlock avoidance; Deadlock detection and recovery from deadlock	<b>6 Hrs</b>
<b>5</b>	<b>Memory Management</b> Memory Management Strategies: Background; Swapping Contiguous memory allocation; Paging Structure of page table; Segmentation Virtual Memory Management: Background; Demand paging; Copy-on-write; Page replacement Allocation of frames; Thrashing.	<b>6 Hrs</b>
<b>6</b>	<b>Implementation of File System</b> File System: File concept; Access methods Directory structure, File system mounting File sharing; Protection. Implementing File System: File system structure File system implementation; Directory implementation; Allocation methods; Free space management	<b>4 Hrs</b>
<b>Unit III</b>		
<b>7</b>	<b>Secondary Storage Structures, Protection</b> Mass storage structures; Disk structure; Disk attachment; Disk scheduling; Disk management; Swap space management. Protection: Goals of protection, Principles of protection Domain of protection, Access matrix Implementation of access matrix, Access control, Revocation of access rights, Capability-Based systems	<b>4 Hrs</b>
<b>8</b>	<b>Case study – Linux operating system</b>	<b>4 Hrs</b>

Design principles Kernel modules, Process management Scheduling, memory Management File systems, Input & output, Interprocess Communication.

### Lab Activities

<b>Activities : Implement the following programs using C programs</b>			
<b>Sl.no</b>	<b>Topics</b>	<b>Activity</b>	<b>Lab slots</b>
1.	<b>UNIX Commands System Calls.</b>	Program to simulate Unix commands and System calls.	<b>1</b>
2.	<b>Process Synchronization</b>	Program to simulate the following non-preemptive CPU scheduling algorithms to find turnaround time and waiting time. a) FCFS b) SJF c) Round Robin (pre-emptive) d) Priority	<b>1</b>
3.		Program to simulate multi-level queue scheduling algorithm considering the following scenario. All the processes in the system are divided into two categories – system processes and user processes. System processes are to be given higher priority than user processes. Use FCFS scheduling for the processes in each queue.	<b>1</b>
4.	<b>Process Synchronization</b>	Program to simulate and Producer Consumer Problem using semaphores	<b>1</b>
5.		Program to simulate Dining Philosopher's problem	<b>1</b>
6.	<b>Memory Management Techniques</b>	Program to simulate the following contiguous memory allocation techniques a) Worst-fit b) Best-fit c) First-fit	<b>1</b>
7.		Program to simulate paging technique of memory management.	<b>1</b>
8.	<b>Deadlock Avoidance</b>	Program to implement Banker's algorithm.	<b>1</b>
9.	<b>Disk Scheduling</b>	Program to simulate disk scheduling algorithms a) FCFS b) SCAN c) C-SCAN	<b>2</b>
10.	<b>Page replacement algorithms</b>	Program to simulate Unix commands and System calls.	<b>2</b>

	Exercise (Problem execution, Viva & Observation Book)	60
	Structured Enquiry	20
	Total (ISA)	<b>80</b>
<b>End Semester Assessment (20%)</b>	Exercise	<b>20</b>
	<b>Total</b>	<b>100</b>

**Lab Experiments**

<b>Sl.no</b>	<b>Experiments</b>	<b>Lab Slots</b>
<b>1</b>	Identify components of the web: URLs, web browsers, servers, HTTP/HTTPS protocols, and explore web security tools	<b>1</b>
<b>2</b>	Design static web pages using HTML5: semantic tags, multimedia elements, forms, drag-and-drop, and geolocation features	<b>1</b>
<b>3</b>	Implement HTML5 form controls with attributes like required, placeholder, autofocus, and range/meter inputs	<b>1</b>
<b>4</b>	Apply CSS styling (inline, internal, external), box model, and custom layouts to enhance HTML5 pages	<b>1</b>
<b>5</b>	Develop responsive designs using Bootstrap 5: containers, grid system, cards, navbars, modals, and carousels	<b>1</b>
<b>6</b>	Create dynamic web pages using JavaScript: event handling, DOM manipulation, form validation, and dynamic content	<b>1</b>
<b>7</b>	PHP scripts to demonstrate variables, constants, data types, operators, and control structures	<b>1</b>
<b>8</b>	Process HTML form inputs using PHP with conditional statements, loops, and user-defined functions	<b>1</b>
<b>9</b>	Connect PHP with MySQL using MySQLi and perform CRUD operations on a sample database	<b>2</b>
<b>10</b>	Develop a login form with session management, cookie handling, and error validation using PHP and MySQL	<b>2</b>

<b>ISA Marks: 50</b>	<b>ESA Marks: 50</b>	<b>Total Marks: 100</b>
<b>Teaching Hrs: 40</b>	<b>Practical Hrs:--</b>	<b>Exam Duration: 03 Hrs</b>
<b>Unit I</b>		
<b>1</b>	<b>Introduction and Fundamental Programming Structures in Java</b> History of java, features of java, A simple java programming, Comments, Data Types, Variables, Constants, Operators, Control Flow, Big Numbers, Arrays	<b>4 hrs</b>
<b>2</b>	<b>Objects and Classes</b> Introduction to Object-Oriented Programming, Classes, Objects, Identifying Classes, Relationships between Classes, Using Predefined Classes, Objects and Object Variables, Mutator and Accessor Methods, First Steps with Constructors, Implicit and Explicit Parameters, Benefits of Encapsulation, Class-Based Access Privileges, Private Methods, Static Fields and Methods, Method Parameters, Object Construction, Overloading, Packages.	<b>6 hrs</b>
<b>3</b>	<b>Inheritance and Java Strings</b> Classes, Super classes, and Subclasses, Inheritance Hierarchies, Polymorphism, Dynamic Binding, Preventing Inheritance: Final Classes and Methods, Casting, Abstract Classes. Java String, Strings Are Immutable, String Buffer class, String Builder class, to String () method, String Tokenizer in Java.	<b>5 hrs</b>
<b>Unit II</b>		
<b>4</b>	<b>Interfaces and Inner Classes</b> Interfaces, Properties of Interfaces, Interfaces and Abstract Classes, Object Cloning, Interfaces and Callbacks, Inner Classes, Use of an Inner Class to Access Object State, Special Syntax Rules for Inner Classes, Local Inner Classes, Accessing final Variables from Outer Methods, Anonymous Inner Classes, Static Inner Classes.	<b>5 hrs</b>
<b>5</b>	<b>Exceptions and Multithreading</b> Dealing with Errors, The Classification of Exceptions, Declaring Checked Exceptions, How to Throw an Exception, Creating Exception Classes, Catching Exceptions, Catching Multiple Exceptions, Rethrowing and Chaining Exceptions, The finally Clause; Multithreading:- What Are Threads?, Interrupting Threads, Thread States, Thread Properties.	<b>6 hrs</b>
<b>6</b>	<b>Collections</b> Collection Interfaces, Collection and Iterator Interfaces in the Java Library, Linked Lists, Array Lists, Hash Sets, Tree Sets, Object Comparison, Queues and Dequeues, Priority Queues, Maps.	<b>4 hrs</b>
<b>Unit – III</b>		
<b>7</b>	<b>Servlets</b>	<b>5 hrs</b>

	Background; The life cycle of servlet, A simple servlet, The Servlet API, The javax.servlet Package ,The Servlet Interface, The Servlet Config Interface, Servlet Context Interface, Servlet Request Interface, Servlet Response Interface, The Cookies class.	
<b>8</b>	<b>JSP and Database Access</b> Overview of JSP, Invoking java code from JSP, JSP expressions, scriptlet, page directive.	<b>5 hrs</b>

1	Introduction, Parallel and distributed systems	<p>Compare the three cloud computing delivery models, SaaS, PaaS, and IaaS, from the point of view of the application developers and users. Discuss the security and the reliability of each one of them. Analyze the differences between the PaaS and the IaaS.</p> <p>An IT company decides to provide free access to a public cloud dedicated to higher education. Which one of the three cloud computing delivery models, SaaS, PaaS, or IaaS should it embrace and why? What</p>	15

<b>Program: Master of Computer Applications</b>		<b>Semester: II</b>
<b>Course Title: Cloud Computing</b>		<b>Course Code: 24ECAC708</b>
<b>L-T-P : 3-0-1</b>	<b>Credits: 4</b>	<b>Contact Hours: 5 hrs/week</b>
<b>ISA Marks: 50</b>	<b>ESA Marks: 50</b>	<b>Total Marks: 100</b>
<b>Teaching Hours: 40</b>	<b>Practical:24</b>	<b>Examination Duration: 3 Hrs</b>
<b>Unit I</b>		
<b>1</b>	<b>Introduction, Parallel and distributed systems</b> Network-centric computing and network centric content, peer-to-peer systems, Cloud computing basics, delivery models and services, Ethical issues, cloud vulnerabilities, major challenges; parallel computing, parallel computer architecture, Distributed systems, communication protocol and process coordination, logical clocks, message delivery rules, casual delivery, Concurrency, atomic actions, consensus protocols, modularity: client-server paradigm.	<b>6 Hrs</b>
<b>2</b>	<b>Cloud Infrastructure</b> Cloud computing at Amazon, cloud computing: the Google perspective, Microsoft windows Azure and online services; open-source software platforms for private clouds; Cloud storage diversity and vendor lock-in; Cloud computing interoperability: the intercloud; Energy use and ecological impact of large-scale data centers; Service and compliance level agreements; User experience; Software licensing.	<b>6 Hrs</b>
<b>3</b>	<b>Cloud Computing: Applications and Paradigms</b> Challenges for cloud computing; Existing cloud applications and new application opportunities; Architectural styles for cloud applications; Workflows: Coordination of multiple activities; The MapReduce programming model; Case studies.	<b>4 Hrs</b>
<b>Unit II</b>		
<b>4</b>	<b>Cloud Resource Virtualization</b> Virtualization; Layering and virtualization; Virtual machine monitors; Virtual machines; Performance and security isolation; Full virtualization and Para virtualization; Hardware support for virtualization; Case study; Optimization of network virtualization; vBlades; A performance comparison of virtual machines; Software fault isolation;	<b>6 Hrs</b>
<b>5</b>	<b>Cloud Resource Management and Scheduling</b> Policies and mechanisms for resource management; Applications of control theory to task scheduling on a cloud; Stability of a two-level resource allocation architecture; Feedback control based on dynamic thresholds; Coordination of specialized autonomic performance managers; A utility-based model for cloud-based web services; Resource bundling; Scheduling algorithms for computing clouds; Fair queuing; Resource management and dynamic application scaling.	<b>6 Hrs</b>
<b>6</b>	<b>Networking Support</b>	<b>4 Hrs</b>

	Packet-switched networks; The Internet; Internet migration to IPV6; The transformation of the Internet; Web access and the TCP congestion control window; Network resource management; Interconnection networks for computer clouds; Content-delivery networks; Overlay networks and small-world networks.	
<b>Unit III</b>		
<b>7</b>	<b>Storage Systems</b> The evolution of storage technology; Storage models, file systems and databases; Distributed file systems: The precursors; General parallel file system; Google File System; Apache Hadoop; Locks and Chubby: A locking service; Transaction processing and NoSQL and databases; BigTable; Megastore.	<b>4 Hrs</b>
<b>8</b>	<b>Cloud Security</b> Cloud security risks; Security: The top concern for cloud users; Privacy and privacy impact assessment; Trust; Operating system security; Virtual machine security; Security of virtualization; Security risks posed by shared images; Security risks posed by a management OS; A trusted virtual machine monitor.	<b>4 Hrs</b>
<b>Text Books :</b> <ol style="list-style-type: none"> <li>1. Dan C. Marinescu, Cloud Computing: Theory and Practice, Morgan Kaufmann publishers, Second Edition, 2018.</li> </ol>		
<b>Reference Books:</b> <ol style="list-style-type: none"> <li>1. Volte, Robert Elsenpeter: Cloud Computing, A Practical Approach, McGraw Hill, 2010.</li> <li>3. Cloud Computing for Dummies: J. Hurwitz, ISBN 978-0-470-484-8</li> <li>4. Dr. Kumar Sourabh, Cloud Computing, 2nd Edition, Wiley India, 2011.</li> </ol>		

		<p>Applications would be most beneficial for the students? Will this solution have an impact on distance learning? Why?</p> <p>What is in your opinion the critical step in the development of a systematic approach to all-or-nothing atomicity? What does a systematic approach means? What are the advantages of a systematic versus an ad-hoc approach to atomicity?</p>	
<b>2</b>	Cloud Infrastructure	Several desirable properties of a large-scale distributed system includes transparency of access, location, concurrency, replication, failure, migration, performance, and scaling. Analyze how each one of these properties applies to AWS.	<b>15</b>

		<p>Demonstration Cloud services using AWS or Azure or Google Cloud.</p> <ul style="list-style-type: none"><li>• Compare the Oracle Cloud offerings (see <a href="https://cloud.oracle.com">https://cloud.oracle.com</a>) with the cloud services provided by Amazon, Google, and Microsoft.</li></ul>	
3	Cloud Computing: Applications and Paradigms	<p>Download and install the Zookeeper from the site <a href="http://zookeeper.apache.org/">http://zookeeper.apache.org/</a>. Use the API to create the basic workflow patterns or Use the AWS Cloud Formation service to create the basic workflow patterns.</p> <p>Search the web for reports of cloud system failures and discuss the causes of each incident.</p> <p>Research the power consumption of processors used in mobile devices and their energy efficiency. Rank the components of a mobile device in terms of power consumption. Establish a set of guidelines to minimize the power consumption of mobile applications.</p>	10
4	Cloud Resource Virtualization	<p>Virtualization simplifies the use of resources, isolates users from one another, supports replication and mobility, but exacts a price in terms of performance and cost. Analyze each one of these aspects for: (i) memory virtualization, (ii) processor virtualization, and (iii) virtualization of a communication channel.</p> <p>Virtualization of the processor combined with virtual memory management pose multiple challenges; analyze the interaction of interrupt handling and paging.</p> <ul style="list-style-type: none"><li>• In Section 5.6 we state that a VMM for a processor can be constructed if the set of sensitive instructions is a subset of the privileged instructions of that processor. Identify the set of sensitive instructions for the x86 architecture and discuss the problem each one of these instruction poses.</li></ul>	15
5	Cloud Resource Management and Scheduling	<p>Analyze the benefits and the problems posed by the four approaches for the implementation of resource management policies: control theory, machine learning, utility based, market-oriented.</p> <p>Can optimal strategies for the five classes of policies, admission control, capacity allocation, load balancing,</p>	15

		<p>energy optimization, and QoS guarantees be actually implemented in a cloud? Support your answer with solid arguments.</p> <ul style="list-style-type: none"><li>• Multiple controllers are probably necessary due to the scale of the cloud. Is it beneficial to have system and application controllers? Justify your answers.</li></ul>	
6	Networking Support	<p>Implementation Simple IPC (Client Server Communication) Simple chat server</p> <ul style="list-style-type: none"><li>• multi-threaded File Server</li></ul>	10
7	Storage Systems	<p>Analyze the reasons for the introduction of storage area networks (SANs) and their properties.</p> <p>Block virtualization simplifies the storage management tasks in SANs. Provide solid arguments in support of this statement.</p> <p>The designers of the Google file system (GFS) have re-examined the traditional choices for a file system. Discuss observations regarding these choices that have guided the design of GFS.</p>	10
8	Cloud Security	<p>Write a survey paper on cloud computing security: Issues, threats, and solutions</p>	10

**Students can design and develop web / mobile applications using the latest technology.**

**Objectives:**

Help students to utilize and strengthen the knowledge Web Technology which they have learnt in previous semester.

**Methodology:**

Students are asked to make a team of 3-4 members and can choose the different categories of projects like desktop applications, web applications, mobile application and distributed application and work once it is approved by the coordinator.

**Assessment:**

**Students Assessment through ISA (80%) + ESA (20%)**

<b>Continuous Internal Evaluation</b>	<b>Assessment</b>	<b>Marks</b>

<b>2</b>	<b>Intermediate Dart Programming</b> Dart classes and constructors, Interfaces, abstract classes, and mixins, Understanding Dart libraries and packages.	<b>7 Hrs</b>
<b>3</b>	<b>An Introduction to Flutter</b> Comparisons with other mobile app development frameworks, Flutter compilation (Dart), Flutter rendering, Widgets introduction. <b>Widgets: Building Layouts in Flutter:</b> Stateful versus stateless widgets, Built-in widgets, understanding built-in layout widgets, creating a UI with widgets (favor manager app), Creating custom widgets.	<b>6 Hrs</b>
<b>4</b>	<b>Handling User Input and Gestures</b> Handling user gestures, Input widgets, Validating Input (Forms), Custom input and TextFormField. <b>Theming and Styling:</b> Theme widgets, Material Design, iOS Cupertino, Using custom fonts, Dynamic styling with MediaQuery and LayoutBuilder.	<b>6 Hrs</b>
<b>5</b>	<b>Routing: Navigating between Screens</b> Understanding the Navigator widget, named routes, Screen transitions. <b>Firestore Plugins:</b> Firestore overview, Firestore authentication, NoSQL database with Cloud Firestore.	<b>6 Hrs</b>
<b>6</b>	<b>Platform Views and Map Integration</b> Displaying a map, Adding markers to the map, Adding map interactions, Using the Google Places API	<b>7 Hrs</b>
<b>7</b>	<b>Testing, Debugging, and Deployment</b> Flutter testing – unit and widget testing, Debugging Flutter apps, Profiling Flutter apps, Preparing apps for deployment.	<b>5 Hrs</b>
<b>8</b>	<b>Improving User Experience</b> Accessibility in Flutter and adding translations to apps, Communication between native and Flutter with platform channels, Creating background processes, Adding Android-specific code to run Dart code in the background.	<b>5 Hrs</b>
<b>Text Book:</b> 1. Flutter for Beginners- An introductory guide to building cross-platform mobile applications with Flutter and Dart 2, September 2019 1 <sup>st</sup> Edition by Alessandro Biessek, <b>Reference Books:</b> 1. Flutter- A Hands On Guide To App Development by Marco L. Napoli 2. Beginning App Development with Flutter: Create Cross-Platform Mobile Apps, 1st Edition, by Rap Payne.		

### Evaluation Scheme

In Semester Assessment (80%)	Assessment	Weightage in Marks
	Exercise (Problem execution, Viva & Observation Book)	60
	Structured Enquiry	20
	Total (ISA)	<b>80</b>
End Semester Assessment (20%)	Exercise	<b>20</b>
	<b>Total</b>	<b>100</b>

### List of Experiments

Sl.No	Experiments	Lab Slots
<b>1</b>	Write Dart functions to implement various mathematical operations	<b>1</b>
<b>2</b>	Write dart program to implement control flow statements.	<b>1</b>
<b>3</b>	Create a UI layout using built-in widgets such as Column, Row, Container using both stateless and stateful widgets	<b>1</b>
<b>4</b>	Create custom widgets in Flutter for reusable UI components.	<b>1</b>
<b>5</b>	Create a flutter layout to handle user input and gestures.	<b>2</b>
<b>6</b>	Create a login screen layout using flutter with validations	<b>2</b>
<b>7</b>	Develop a Flutter app with a navigation drawer.	<b>1</b>
<b>8</b>	Create a flutter app and use Firebase authentication.	<b>1</b>
<b>9</b>	Create a flutter app to display and interact with Google Maps.	<b>1</b>
<b>10</b>	Develop a mobile app having features such as Launch screen, Login with validations, home screen with navigation drawer and a screen having Google maps.	<b>1</b>

[BACK](#)

<b>Program: Master of Computer Applications</b>		<b>Semester: III</b>
<b>Course Title: Mini Project-2</b>		<b>Course Code: 23ECAP802</b>
<b>L-T-P : 0-0-2</b>	<b>Credits: 2</b>	<b>Contact Hours: 4 hrs/week</b>
<b>ISA Marks: 50</b>	<b>ESA Marks:50</b>	<b>Total Marks: 100</b>
<b>Teaching Hrs: --</b>	<b>Practical:56</b>	<b>Examination Duration:3 Hrs</b>

Students can use the following tools in web and mobile applications as well as product developments:

- Struts, Spring, Hibernate and JPA
- Machine Learning & Deep Learning
- JAXB and Apache Axis 2/Java
- JSP, Servlets, JDBC, EJB, JMS, JTA and JUnit
- Apache Tomcat, JBoss and GlassFish
- JavaScript, JSF, GWT and jQuery
- Eclipse, Netbeans and JBoss tools
- TestNG
- jBPM and Drools
- JCR

**Objectives:**

Help students to utilize and strengthen the knowledge of java which they have learnt in previous semester.

**Methodology:**

Students are asked to make a team of 3-4 members and can choose the different categories of projects like desktop applications, web applications, mobile application and distributed application and work once it is approved by the coordinator.

### 1.1 Course Objectives:

The Mini Project being part of the course work is not only a mechanism to demonstrate the abilities and specialization but also provides the opportunity to demonstrate originality, teamwork, inspiration, planning and organization in a software project. One can put into practice the techniques that have been taught throughout the previous courses. Mini-projects develop practical skills in students. The idea is to propose a problem that one might encounter in future career (be it in academia, industry, or government). Then propose a solution and implement it.

#### **E-commerce Objectives:**

Most business houses are shifting their operations to the online world. Right from buying apparels to computers to booking tickets and renting out apartments, everything can be done through the Internet now. It is a win-win formula for both the customers and the business houses. Digital India aims to boost E-business and the E-commerce industry with the vision that it would in turn boost the economy as a whole.

#### **Multilingual Objectives:**

Language is an essential driver of enterprise growth. The user interface is the key component of any application that needs to support various language speaking audiences. Making an app that appeals to and is available for more users broadens the market and brings more revenue in the app sales and there will be more exposure to the business.

- **Evaluation:** The project assessment is done by an evaluation team as per the schedule.

In-Semester Assessment	Assessment	Marks
	Problem Definition, Literature Review	05
	Synopsis and Software Requirement Specification(SRS)	05
	Design (Block Diagram, Data Flow Diagram [DFD], Entity-Relationship [ER] Diagram, and Use-case Diagrams)	10
	Coding and Implementation	10
	Integration and testing	05
	Project Report	10
	Presentation skills and Viva-voce	05
	<b>Total</b>	<b>50</b>
End-Semester Assessment	Presentation, Demonstration	30
	Modification	10
	Viva-voce	10
	<b>Total</b>	<b>50</b>

### Elective – 1 and 2

<b>Program: Master of Computer Applications</b>		<b>Semester: III</b>
<b>Course Title: Linux Administration</b>		<b>Course Code: 23ECAE801</b>
<b>L-T-P:3-0-0</b>	<b>Credits: 3</b>	<b>Contact Hrs: 3 hrs/week</b>
<b>ISA Marks: 50</b>	<b>ESA Marks: 50</b>	<b>Total Marks: 100</b>
<b>Teaching Hrs: 40</b>	<b>Practical: --</b>	<b>Exam Duration: 3 Hours</b>
<b>Unit I</b>		
<b>1</b>	<b>Basic System Configuration</b> Opening Graphical Applications, System Locale and Keyboard Configuration: Setting the System Locale, Changing the Keyboard Layout, Managing Users and Groups; Introduction to Users and Groups, Managing Users in a Graphical Environment..	<b>4 Hrs</b>
<b>2</b>	<b>Package Management, Services and Daemons</b> Yum: Checking For and Updating Packages, Packages and Package Groups, Configuring Yum and Yum Repositories. Configuring Services, Running Services OpenSSH: The SSH Protocol, An Open SSH Configuration, Open SSH Clients	<b>6 Hrs</b>
<b>3</b>	<b>Web &amp; Mail Servers :</b> Web Servers: The Apache HTTP Server Updating the Configuration, Running the httpd Service, Editing the Configuration Files, Working with Modules , Setting Up Virtual Hosts, Setting Up an SSL Server. Mail Servers- Email Protocols, Email Program Classifications, Mail Transport Agents, Mail Delivery Agents, Mail User Agents	<b>6 Hrs</b>
<b>Unit II</b>		
<b>4</b>	<b>File &amp; Directory Servers :</b> FTP Servers : The File Transfer Protocol, FTP Servers, Files Installed with vsftpd, Starting and Stopping vsftpd,vsftpd Configuration Options.Runing FTP Server Samba Server : Introduction to Samba, Samba Daemons and Related Services, Connecting to a Samba Share, Configuring a Samba Server ,Starting and Stopping Samba, Samba Server Types and the smbconf File, Samba Security Modes, Samba Account Information Databases, Samba Network Browsing , Samba with CUPS Printing Support, Samba Distribution Programs Directory Servers -OpenLDAP, Introduction to LDAP, Installing the OpenLDAP Suite , Configuring an OpenLDAP Server , SELinux Policy for Applications Using LDAP, Running an OpenLDAP Server, Configuring a System to Authenticate Using OpenLDAP	<b>10 Hrs</b>
<b>5</b>	<b>Viewing and Managing Log Files -</b> Locating Log Files, Basic Configuration of Rsyslog, Working with Queues in Rsyslog , Using Rsyslog Modules , Interaction of Rsyslog and Journal, Structured Logging with Rsyslog , Debugging Rsyslog, Using the Journal, Managing Log Files in a Graphical Environment.	<b>6 hrs</b>

### Unit – III

<b>6</b>	<b>Working with the GRUB 2 Boot Loader</b> Configuring the GRUB 2 Boot Loader, Customizing GRUB Menu, GRUB 2 Password Protection, Reinstalling GRUB , GRUB 2 over Serial Console, Terminal Menu Editing During Boot, UEFI Secure Boot	<b>4 Hrs</b>
<b>7</b>	<b>Automating System Tasks</b> -Cron and Anacron- Installing Cron and Anacron, Running the Crond Services, Configuring Anacron Jobs, Configuring Cron Jobs, Controlling Access to Cron, Black and White Listing of Cron Jobs At and Batch-Installing At and Batch, Running the At Service, Configuring an At Job, Configuring a Batch Job, Viewing Pending Jobs, Additional Command Line Options, Controlling Access to At and Batch.	<b>4 Hrs</b>
<b>Textbook:</b> 1. Fedora 21 System Administrator's Guide: Deployment, Configuration, and Administration of Fedora 21 by Jaromír Hradílek, Douglas Silas, Martin Prpič, Publisher: Red Hat, Release Date: 2014.		
<b>Reference Books:</b> 1. Linux System Administration Recipes: A Problem-Solution Approach by Juliet Kemp, Publisher: Apress, Release Date: October 2009. 2. IT Infrastructure Management by Anita Sengar, Publisher: S.K. Kataria & Sons, Release Date: 2010(Reprint2020). 3. IT Infrastructure Architecture: Infrastructure Building Blocks and Concepts by Sjaak Laan, Publisher: Lulu Press Inc., Release Date: February 2013.		

### Evaluation Scheme:

#### 1. In Semester Assessment (ISA)

Assessment	Marks
ISA-1	25
ISA-2	25
ISA	50
ESA	50
Total	100

## 2. End Semester Assessment (ESA) Pattern:

UNIT	8 Questions to be set of 20 Marks Each	Chapter Nos.	Instructions
I	3 Questions to be set of 20 Marks Each	1, 2, 3	Any 2 questions are to be answered
II	3 Questions to be set of 20 Marks Each	4,5	Any 2 questions are to be answered
III	2 Questions to be set of 20 Marks Each	6,7	Any 1 question is to be answered

<b>Program: Master of Computer Applications</b>		<b>Semester: III</b>
<b>Course Title: DevOps</b>		<b>Course Code: 23ECAE802</b>
<b>L-T-P: 2-0-1</b>	<b>Credits: 3</b>	<b>Contact Hrs: 4 hrs/week</b>
<b>ISA Marks: 66</b>	<b>ESA Marks: 34</b>	<b>Total Marks: 100</b>
<b>Teaching Hrs: 30</b>	<b>Practical: 24</b>	<b>Exam Duration: 2 Hrs</b>
<b>Unit I</b>		
<b>1</b>	<b>Introduction to DevOps and Revision Control System</b> DevOps Principles and Practices, Agile Wheel of Wheels, DevOps and ITIL Alignment, Git Overview, Build Servers, Artifact Repositories, Package Managers, Test Environments, Staging vs. Production, Release Management, Scrum, Kanban, Delivery Pipeline Walkthrough, Identifying Bottlenecks in Software Delivery.	<b>4 Hrs</b>
<b>2</b>	<b>Everything is Code</b> Roles and Code Responsibilities, Selecting SCM Tools, Source Code Migration Considerations, Branching Strategies and Pitfalls, Artifact Version Naming Best Practices, Setting Up a Basic Git Server, Shared Authentication, Git Hosting Platforms, Handling Large Binary Files, Exploring Alternative Git Server Implementations.	<b>5 Hrs</b>
<b>3</b>	<b>Git Workflows, Gerrit, Docker, and GitLab CI</b> Docker Basics and Usage, Introduction to Gerrit, Installing git-review Package, History Revisionism, Pull Request Models, Peer Reviews, GitLab Overview, CI/CD Pipelines.	<b>6 Hrs</b>
<b>Unit II</b>		
<b>4</b>	<b>Building the Code</b> Why we build code, build systems and CI/CD, Jenkins setup and plugin ecosystem, dependency management in Jenkins, Jenkins architecture: host server and build slaves, Jenkins job triggers, pipelines, and job chaining, Jenkins filesystem layout and infrastructure as code, build order and phases.	<b>5 Hrs</b>
<b>5</b>	<b>Testing the Code</b> Manual vs. automated testing, unit testing with JUnit (including examples), mocking and code coverage tools, integration testing strategies, automated testing in Jenkins pipelines.	<b>5 Hrs</b>
<b>6</b>	<b>Deploying the Code</b> OS-Level Configuration for Deployment, Cluster and Environment Setup, Package Delivery and Versioned Releases, Docker Deployment Workflow, Introduction to Kubernetes, Pods, Deployments, Services, Containerization Principles, Orchestration Principles	<b>5 Hrs</b>
<b>Textbook:</b>		
1. Practical DevOps by Joakim Verona Publisher: Packt Publishing, Release Date: February 2018.		
<b>Reference Books:</b>		

1. Effective DevOps: Building a Culture of Collaboration, Affinity and Tooling at Scale by Jennifer Davis and Ryn Daniels, Publisher: O'Reilly Media, Release Date: June 2016.

2. The DevOps Handbook: How to Create World-Class Agility, Reliability, and Security in Technology Organizations by Gene Kim, Patrick Debois, John Willis, Jez Humble, and Nicole Forsgren, Publisher: IT Revolution Press, Release Date: November 2021.

### Evaluation Scheme

#### 1. In Semester Assessment (ISA)

Assessment	Marks
ISA- 1	15
ISA- 2	15
ISA- Lab	36
ISA	66
ESA	34
Total	100

#### 2. End Semester Assessment (ESA)

UNIT	6 Questions to be set of 15 Marks Each	Chapter Nos.	Instructions
I	3 Questions to be set of 15 Marks Each	1, 2, 3	Any 2 full questions are to be answered
II	3 Questions to be set of 15 Marks Each	4,5,6	Any 2 questions are to be answered

### Lab Activities

Sl.no	Practices	Lab slots
1	<b>Git Basics &amp; Version Control Setup</b> Initialize a Git repository, create branches, push/pull changes from GitHub, and simulate version history.	1
2	<b>Agile &amp; Scrum Simulation</b> Use a Kanban board (Trello/Jira) to create and manage a mini sprint backlog and simulate task progress.	1
3	<b>Build Server &amp; Artifact Management</b> Set up a mock build server (using scripts or Jenkins) and simulate artifact generation/storage in a local repo (like Nexus/Artifactory).	1
4	<b>Source Code Management &amp; Git Server Setup</b> Install and configure a local Git server (e.g., Gitea), create users with shared authentication, and clone repositories.	1
5	<b>Branching Strategy &amp; Merge Conflicts</b> Practice Git branching (feature/release/hotfix) and resolve simulated merge conflicts between branches.	1
6	<b>Code Review using Gerrit</b>	1

	Install Gerrit, configure `git-review`, and conduct a sample peer code review process.	
<b>7</b>	<b>Docker Image Build &amp; Containerization</b> Write a simple Dockerfile, build a custom Docker image, and run a containerized app (e.g., a simple Node.js or Python app).	<b>1</b>
<b>8</b>	<b>CI/CD Pipeline with GitLab CI</b> Create a `.gitlab-ci.yml` file to automate testing and deployment stages on GitLab.	<b>1</b>
<b>9</b>	<b>Jenkins CI Job Configuration</b> Install Jenkins, configure a freestyle or pipeline job, manage build triggers, and integrate Git repository.	<b>2</b>
<b>10</b>	<b>Automated Testing &amp; Kubernetes Deployment</b> Write and run unit tests using JUnit, configure Jenkins to trigger tests, then deploy a Dockerized app to a Kubernetes cluster using `kubectl`.	<b>2</b>

<b>Program: Master of Computer Applications</b>		<b>Semester: III</b>
<b>Course Title: User Interface Design</b>		<b>Course Code: 23ECAE803</b>
<b>L-T-P: 3-0-0</b>	<b>Credits: 3</b>	<b>Contact Hrs: 3 hrs/week</b>
<b>ISA Marks: 50</b>	<b>ESA Marks: 50</b>	<b>Total Marks: 100</b>
<b>Teaching Hrs: 40</b>	<b>Practical:--</b>	<b>Exam Duration:3 Hrs</b>
<b>Unit I</b>		
<b>1</b>	<b>What Users Do</b> The Basics of User Research ,Users' Motivation to Learn, The Patterns.	<b>5 Hrs</b>
<b>2</b>	<b>Organizing the Content: Information Architecture and Application Structure</b> The Big Picture, The Patterns:- Feature, Search, and Browse, News Stream, Picture Manager, Dashboard, Canvas Plus Palette, Wizard.	<b>5 Hrs</b>
<b>3</b>	<b>Getting Around: Navigation, Signposts, and Wayfinding</b> Staying Found, The Cost of Navigation, Navigational Models, Design Conventions for Websites, The Patterns:- Clear Entry Points, Menu Page, Pyramid, Modal Panel, Deep-linked State, Escape Hatch, Fat Menus, Sitemap Footer, Sign-in Tools, Sequence Map, Breadcrumbs, Annotated Scrollbar, Animated Transition.	<b>6 Hrs</b>
<b>Unit II</b>		
<b>4</b>	<b>Organizing the Page: Layout of Page Elements</b> The Basics of Page Layout, The Patterns:- Visual Framework, Center Stage, Grid of Equals, Titled Sections, Module Tabs, Collapsible Panels, Movable Panels, Right/Left Alignment, Diagonal Balance.	<b>5 Hrs</b>
<b>5</b>	<b>Lists of Things</b> Use Cases for Lists, Back to Information Architecture, The Patterns:- Two-Panel Selector, One-Window Drilldown, List Inlay, Thumbnail Grid, Row Striping, Jump to Item, Cascading Lists, Tree Table.	<b>5 Hrs</b>
<b>6</b>	<b>Doing Things: Actions and Commands</b> Pushing the Boundaries, The Patterns:- Button Groups, Hover Tools, Action Panel, Smart Menu Items, Preview, Progress Indicator, Macros.	<b>6 Hrs</b>
<b>Unit – III</b>		
<b>7</b>	<b>Showing Complex Data: Trees, Charts, and Other Information Graphics</b> The Basics of Information Graphics, The Patterns:- Overview Plus Detail, Datatips, Data Spotlight, Dynamic Queries, Data Brushing, Local Zooming, Sortable Table, Radial Table, Multi-Y Graph, Small Multiples, Treemap.	<b>4 Hrs</b>
<b>8</b>	<b>Getting Input from Users: Forms and Controls</b> The Basics of Form Design, Control Choice, The Patterns:- Forgiving Format, Structured Format, Fill-in-the-Blanks, Input Hints, Input Prompt, Password Strength Meter, Autocompletion, Dropdown Chooser, Same-Page Error Messages.	<b>4 Hrs</b>
<b>Text Book:</b> 1. Jenifer Tidwell, Designing Interfaces, 2nd Edition, O'Reilly ,2010		
<b>Reference Books:</b> 1. Laws of UX, Jon Yablonski, O'Reilly, April 2020. 2. 100 Things Every Designer Needs to Know About People, Susan Weinschenk, New Riders, 2011. 3. Jodie Moule., Killer UX Design, SitePoint,2012

<b>Program: Master of Computer Applications</b>		<b>Semester: III</b>
<b>Course Title: C# Programming with .Net</b>		<b>Course Code: 23ECAE806</b>
<b>L-T-P: 3-0-0</b>	<b>Credits: 3</b>	<b>Contact Hrs: 3 hrs/week</b>
<b>ISA Marks: 50</b>	<b>ESA Marks: 50</b>	<b>Total Marks: 100</b>
<b>Teaching Hrs: 40</b>	<b>Practical:--</b>	<b>Exam Duration:3 Hrs</b>
<b>Unit I</b>		
<b>1. The Philosophy of .NET</b>	Understanding the Previous State of Affairs, The .NET Solution, Introducing the Building Blocks of the .NET Platform (CLR,CTS, and CLS), The Role of the .NET Base Class Libraries, What C# Brings to the Table, An Overview of .NET Assemblies, The Role of the Common Intermediate Language , The Role of .NET Type Metadata, The Role of the Assembly Manifest, Compiling CIL to Platform –Specific Instructions, Understanding the Common Type System, Intrinsic CTS Data Types, Understanding the Common Languages Specification, Understanding the Common Language Runtime, The Assembly/Namespace/Type Distinction, Using ildasm.exe, Deploying the .NET Runtime, The Platform independent nature of .NET, Installing the .NET Framework, C# Command-Line Compiler, Building C# Applications using csc.exe, Working with csc.exe Response Files.	<b>08 Hrs</b>
<b>2. C# Language Fundamentals.</b>	The Anatomy of a Simple C# Class, An Interesting Aside : The System.Environment Class, Defining Classes and Creating objects, The System.Console Class, Establishing Member Visibility, Default Values of Class Member Variables, Member Variable Initialization Syntax, Defining Constant Data, Defining Read-only fields, Understanding the static keyword, Method Parameter Modifiers, Iteration Constructs, Decision Constructs and the Relational/Equality Operators, Understanding Value Types and Reference Types, Understanding Boxing and Unboxing Operations, Working with .NET Enumerations, The Master Class: System.Object, Overriding some default behaviours of System.Object, The System Data types( and C# Shorthand notation), The System.String data types, The role of System.Text.StringBuilder, .NET Array Types, Understanding C# Nullable Types, Defining Custom Namespaces	<b>04 Hrs</b>
<b>3. Object-Oriented Programming with C#</b>	Understanding the C# Class Type, Reviewing the Pillars of OOP, The First Pillar: C#'s Encapsulation Services, The Second Pillar: C#'s Inheritance Support, Programming for Containment/Delegation, The Third Pillar: C #'s Polymorphic Support, C# Casting rules, Understanding C# Partial types, Documenting C# Source Code via XML	<b>04 Hrs</b>
<b>Unit II</b>		
<b>4. Object Lifetime and Exceptions Handling.</b>	Classes, Objects and References, the basics of Object Lifetime, The role of Application Roots, Understanding Object Generations, System.GC type, Building Finalizable Objects, Building Disposable Objects, Building Finalizable and Disposable types. Ode to Errors, Bugs, and Exceptions, The Role of .NET Exception Handling, The Simplest possible example, Configuring the state of an exception, System – Level Exception	<b>8 Hrs</b>

	(System. System Exception), Application-Level Exception (System.ApplicationException), Processing Multiple Exception, The Finally Block, The result of unhandled exceptions, Debugging Unhandled exceptions using VS. NET.	
<b>5.</b>	<b>Interfaces and Collections</b> Defining Interfaces in C#, Implementing an Interface in C#, Contrasting Interfaces to Abstract Base Classes, Invoking Interface Members at the Object Level, Interfaces As Parameters, Interfaces As Return Values, Arrays of Interfaces Types, Understanding Explicit Interface Implementation, Building Interface Hierarchies, Implementing Interfaces Using Visual Studio 2005, Building Enumerable Types(IEnumerable and IEnumerator), Building Cloneable Objects(ICloneable), Building Comparable Objects(Comparable), The Interfaces of the System.Collections Namespace, The Class Types of System.Collections.	<b>4 Hrs</b>
<b>6.</b>	<b>Callback Interfaces, Delegates, and Events, Advanced C# Techniques</b> Understanding Callback Interfaces, Understanding the .NET Delegate type, Defining a Delegate in C#, The System.MulticastDelegate and System.Delegate Base Classes, Investigating a Delegate Object, Delegates as Parameters, Understanding C# Events Building a Custom Indexer, Internal Representations of Type Indexers: Final Details, Understanding Operator Overloading Binary Operators, Unary Operators, Equality Operators, Comparison Operators, Understanding Custom Type Conversions, The Advanced Key words of C#, C# Preprocessor Directives.	<b>4 Hrs</b>
<b>Unit – III</b>		
<b>7.</b>	<b>Records</b> Background, Defining a Record, Nondestructive Mutation, Property Validation, Calculated Fields and Lazy Evaluation, Primary Constructors, Records and Equality Comparison	<b>04 Hrs</b>
<b>8.</b>	<b>Programming with Windows Forms and Database Access with MS SQL Server</b> Controls, Building Custom Windows Forms Controls, Defining Custom Events, Defining Custom Properties, Overview of Data Access, Creating database connections, connecting to MSSQL Server, Dataset and Data table features, using inline SQL Statements, using stored procedures , Executing select commands, SQL transaction	<b>04 Hrs</b>
<b>Text Book:</b> <ol style="list-style-type: none"> <li>1. Pro C# 9 with .NET 5, Foundational Principles and Practices in Programming, Apress, Troelsen, Andrew, Japikse, Philip, 10 edition .</li> <li>2. C# 9.0 in a Nutshell by Joseph Albahari, O'Reilly Media Inc 2021</li> </ol>		
<b>Reference Books:</b> <ol style="list-style-type: none"> <li>1. .NET 4.0 Programming (6-in-1), Black Book, Kogent Learning Solutions Inc. Wiley-Dream Tech Press</li> <li>2. ISA	66
ESA	34
Total	100

#### 2. End Semester Assessment (ESA)

UNIT	6 Questions to be set of 15 Marks Each	Chapter Nos.	Instructions
I	3 Questions to be set of 15 Marks Each	1, 2, 3	Any 2 full questions are to be answered
II	3 Questions to be set of 15 Marks Each	4, 5, 6	Any 2 questions are to be answered

### Lab Activities

Sl.no	Practices	Lab slots
1	<b>JavaScript &amp; TypeScript Practice</b> Develop small programs using ES6+ features and demonstrate closures, callbacks, promises and async/await.	1
2	<b>React Component Design</b> Build a React-based user profile card that uses props and state to display and toggle user information.	1
3	<b>Form Handling &amp; Routing in React</b> Create a multi-step form in React with validation and navigation using React Router.	1
4	<b>Global State Management</b> Implement a theme toggler app using Context API and manage user authentication state using Redux Toolkit.	1
5	<b>RESTful API with Express.js</b>	1

	Design a basic CRUD API for product management using Express.js, including middleware for logging and error handling.	
<b>6</b>	<b>JWT Authentication</b> Create a secure login system using JWT for user authentication and protect backend routes.	<b>1</b>
<b>7</b>	<b>MongoDB CRUD with Mongoose</b> Build a backend to manage student records with MongoDB and Mongoose including schema validation.	<b>2</b>
<b>8</b>	<b>Review Submission with File Upload</b> Develop a feedback form in React and use Multer in Express.js to handle file/image uploads to the server.	<b>1</b>
<b>9</b>	<b>GraphQL API Development</b> Create a GraphQL server with schema for books and implement basic queries and mutations. Fetch data in React using Apollo Client.	<b>1</b>
<b>10</b>	<b>Real-Time Chat App</b> Implement a live chat feature using Socket.io in Node.js and React, enabling real-time user interaction.	<b>2</b>

## WEB CONTENT MANAGEMENT SYSTEM – COURSE PROJECT

### COURSE DESCRIPTION:

Today, many web publishers use content management systems (CMS) to allow them to instantly and dynamically update web pages and properties as new content becomes available so that every visit to a site is engaging, informative, and meaningful. The course project shall explore any one of the three most popular open source web-based content management systems—WordPress, Joomla, and Drupal—to create dynamic and flexible websites and landing pages. Students shall explore the fundamentals of planning dynamic websites, CMS database management, developing CSS-controlled site templates, and creating database-driven websites through the planning and creation of their own topic-based sites.

### OBJECTIVES

- Introduce learners to any one of the three most popular open source content management systems (CMS) such as WordPress, Drupal, or Joomla.
- Create, deploy and Maintain websites using CMS, including creating and editing content, adding functionality, and creating custom templates and themes.

### COURSE PROJECT TITLE: BUILDING WEBSITE USING CMS (JOOMLA / WORDPRESS OR DRUPAL)

To build website for any real world examples such as Corporate web sites or portals, Online magazines, newspapers, and publications, E-commerce and online reservations, Government applications, Small business web sites, Community-based portals, School, religious web sites or Personal or family homepages using popular Web Content Management System. The website shall facilitate to create, manage, store and deploy content on the Web, including text, graphics, video or audio as a part of Enterprise Content Management.

### EXECUTION PLAN:

Sl.N o	Demonstration	Implementation	Weightage
1.	<b>Introducing Content Management Systems</b> <ul style="list-style-type: none"> <li>○ An overview of some of the different tools and methods that today's web publishers are using to create highly-tailored dynamic web content.</li> <li>○ Purchasing and configuring a domain name and web hosting.</li> </ul>	1. Introduction to Joomla & Installation 2. Domain Name Registration & Configuration and Hosting 3. Create a Database 4. Content Preparation and Planning	20
2.	<b>Introduction to Joomla</b> <ul style="list-style-type: none"> <li>○ Explore the CAM model (Categories, Articles, and</li> </ul>	1. Write an article & put your articles in order with categories. 2. Customize Administrator's Panel	20

	<p>Menus) approach to creating content for Joomla environments.</p> <ul style="list-style-type: none"> <li>Administration and management of users and media.</li> <li>Installing Joomla</li> <li>Exploring the Admin Interface</li> <li>Content creation using the CAM model</li> <li>Content customization: images, video, audio, tags, formats, etc.</li> </ul>	<p>3. Change your website's look with Templates.</p> <p>4. Expand your website's functionality with different extensions.</p> <p>5. Content creation &amp; Customization using the CAM model</p>		
3.	<p><b>Joomla Menus</b></p> <ul style="list-style-type: none"> <li>Creating and controlling menus for Joomla site.</li> <li>To link to articles and create special menu items.</li> <li>Adding and displaying menus</li> <li>Linking menus to articles and other features</li> </ul>	<p>1. Categorize the articles which allow grouping your content better.</p> <p>2. Create menu items for website.</p>	20	
4.	<p><b>Extending Joomla –Plug-ins, Modules</b></p> <ul style="list-style-type: none"> <li>Use of Joomla, Plug-ins, Modules, Components and other extensions.</li> <li>Installation of extensions, Finding and adding Joomla extensions</li> <li>Adding and setting up 2 “big” extensions (choose blog, calendar, image gallery, Paypal-based shopping cart, or portfolio. Other extensions on approval )</li> </ul>	<p>Select Create Joomla Modules for the website such as Feed Display Module, Footer Module, Latest News Module, Search Module, Random Image Module, Who's Online Module etc.</p>	20	
5.	<p><b>Custom Templates</b></p> <ul style="list-style-type: none"> <li>Explore the addition of creation and uses of customized Joomla templates</li> <li>Modifying templates using CSS and HTML tricks.</li> </ul>	<p>Select and Customize template for website.</p>	20	

6.	<b>User management and permissions</b> <ul style="list-style-type: none"><li>○ Explore how to manage users in Joomla site, including managing who sees what based on login, as well as who can do what based on permissions assigned.</li></ul>	Control the use of Captcha, registration allowed and type of registration, default user group new users, reset password, and new user registration email notice to administration.	20
