Vision and Mission of KLE Technological University

Vision

KLE Technological University will be a national leader in Higher Education—recognised globally for innovative culture, outstanding student experience, research excellence and social impact.

Mission

KLE Technological University is dedicated to teaching that meets highest standards of excellence, generation and application of new knowledge through research and creative endeavours.

The three-fold mission of the University is:

- To offer undergraduate and post-graduate programs with engaged and experiential learning environment enriched by high quality instruction that prepares students to succeed in their lives and professional careers.
- To enable and grow disciplinary and inter-disciplinary areas of research that build on present strengths and future opportunities aligning with areas of national strategic importance and priority.
- To actively engage in the Socio-economic development of the region by contributing our expertise, experience and leadership, to enhance competitiveness and quality of life.

As a unified community of faculty, staff and students, we work together with the spirit of collaboration and partnership to accomplish our mission.

Vision and Mission Statements of the Department

Vision

To be a premier center of integrated computer application studies and research towards developing competent professionals equipped with cutting-edge technological skills and knowledge to provide sustainable solutions for the evolving needs of society.

Mission

1. To provide high quality education through outstanding teaching and industry relevant curricula to enable students to accomplish a successful career in Computer Science and applications.
2. To contribute to advancing knowledge in both fundamentals and applied areas of Computer Science.
3. To provide a scholarly environment that enables faculty and students to achieve academic and professional growth.
4. To provide valuable services to society through education, research, and entrepreneurship, in the field of Computer Science and applications.

Program Educational Objectives/Program Outcomes and Program-Specific Objectives

Program Educational Objectives -PEO's

1. Have a strong foundation and ability to apply knowledge of Computer Science, Mathematics, and Humanities to conceive, analyse, design, and implement IT solutions to problems in real-life applications.
2. Have a comprehensive background to practice Software Engineering Principles in various domains that require software architecture, design, development, and testing practices.
3. Understand the professional and ethical obligations of a software engineer towards society and the need for lifelong learning.
4. Have the ability to participate in multi-disciplinary teams using ICT effectively.

Program Outcomes-PO's

1. Computational knowledge: Apply knowledge of computing fundamentals, computing specialization, mathematics, and domain knowledge appropriate for the computing specialization to the abstraction and conceptualization of computing models from defined problems and requirements.
2. Problem analysis: Identify, formulate research literature, and solve complex computing problems, reaching substantiated conclusions using fundamental principles of mathematics, computing sciences, and relevant domain disciplines.
3. Design/Development of Solutions: Design and evaluate solutions for complex computing problems, and design and evaluate systems, components, or processes that meet specified needs with appropriate consideration for public health and safety, cultural, societal, and environmental considerations.
4. Conduct investigations of complex problems: Use research-based knowledge and research methods, including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5. Modern tool usage: Create, select, adapt, and apply appropriate techniques, resources, and modern computing tools to complex computing activities, with an understanding of the limitations.
6. Professional Ethics: Understand and commit to professional ethics and cyber regulations, responsibilities, and norms of professional computing practice.

| |
|--|
| 7. Life-long learning: Recognize the need, and have the ability, to engage in independent learning for continual development as a computing professional. |
| 8. Project management and finance: Demonstrate knowledge and understanding of the computing and management principles and apply these to one's work as a member and leader in a team, to manage projects and in multidisciplinary environments. |
| 9. Communication Efficacy: Communicate effectively with the computing community, and with society at large, about complex computing activities by being able to comprehend and write effective reports, design documentation, make effective presentations and give and understand instructions clearly. |
| 10. Societal and Environmental Concern: Understand and assess societal, environmental, health, safety, legal, and cultural issues within local and global contexts and the consequential responsibilities relevant to professional computing practice. |
| 11. Individual and teamwork: Function effectively as an individual and as a member or leader in diverse teams and multi-disciplinary environments. |
| 12. Innovation and Entrepreneurship: Identify a timely opportunity and use of innovation to pursue that opportunity to create value and wealth for the betterment of the individual and society at large. |
| <i>Program Specific Objectives -PSO's</i> |
| 1. IT skills: An ability and capacity acquired through deliberate, systematic, and sustained effort to carry out complex IT activities involving innovative ideas, technical skills, and interpersonal skills. |
| 2. Professional Competency: Apply computing concepts, skills, and processes to produce a product/project in the domain, demonstrating professional knowledge and attitude. |

Curriculum Structure-Overall

| Course with course code | I | II | III | IV |
|-------------------------|---|--|---------------------------------------|---|
| | Data Structures using C 20ECAC701 | OOPS using Java 21ECAC704 | Machine Learning 21ECAC801 | Professional Certification 22ECAE8XX |
| | Database Management System 20ECAC702 | Data Mining 20ECAC707 | Big Data Analytics 20ECAC801 | Capstone Project Work 20ECAP801 |
| | Computer Networks 21ECAC701 | Software Engineering 21ECAC705 | Programming C# with .Net 22ECAC801 | Elective-3 (MOOC) 22ECAE8XX |
| | Operating System 21ECAC702 | Cloud Computing 20ECAC709 | Elective-1 20ECAE80X | Elective-4 (MOOC) 22ECAE8XX |
| | Web Technology 20ECAC705 | Discrete Mathematical Structures 21ECAB701 | Elective-2 20ECAE80X | |
| | Python Programming Lab. 21ECAP701 | Mathematical Thinking & Logical Reasoning 21EHSC701 | Minor Project 22ECAP803 | |
| | Credits | 24 | 23 | 23 |

Curriculum Content- Course wise

| Program: Master of Computer Applications | | Semester: I |
|---|---|-------------------------------|
| Course Title: Data Structures using C | | Course Code: 20ECAC701 |
| L-T-P : 4-0-2 | Credits: 6 | Contact Hours: 8 |
| ISA Marks: 50 | ESA Marks:50 | Total Marks: 100 |
| Teaching Hours: 50+48 | Examination Duration: 3 Hrs | |
| Chapter No. | Content | Hrs |
| Unit I | | |
| 1 | Overview of C History of C, Features of C, Why to learn C Programming, Basic structure of a C program, Compilation Process in C, Compile time Vs Runtime, Variables, Constants, ASCII value, Data Types, Storage Classes, Operators, Decision Making, Loops, Functions, Scope Rules, Passing arrays to functions, Passing structures to Functions, Character arrays, Pointers, malloc(), calloc(), realloc() and free() functions in C | 10 Hrs |
| 2 | Stacks Definition and examples, Primitive operations, Example, Representing stacks in C, Implementing the pop operation, Testing for exceptional conditions, Implementing the push operation, Examples for infix, postfix, and prefix expressions, Basic definition and examples, Program to evaluate a postfix expression, Converting an expression from infix to postfix, Program to convert an expression from infix to postfix. | 5 Hrs |
| 3 | Recursion Recursive definition and processes, Factorial function, Multiplication of natural numbers, Fibonacci sequence, Binary search, Properties of recursive definition or algorithm. Recursion in C, Factorial in C, Fibonacci numbers in C, Binary search in C, Towers of Hanoi problem | 5 Hrs |
| Unit II | | |
| 4 | Queues and Lists The queue and its sequential representation, C implementation of queues, Insert operation, Priority queue, and array implementation of a priority queue. Linked lists, Inserting and removing nodes from a list, Linked implementation of stacks, get node and free node operations, Linked implementation of queues, Linked list as a data structure, Example of list operations, Header nodes, Lists in C, Array implementation of lists, Limitations of array implementation, allocating and freeing dynamic variables, Linked lists using dynamic variables, Queues as lists in C, Examples of list operations in C, Non integer and non- homogeneous lists, | 10 Hrs |

| | | |
|---|--|---------------|
| | Other list structures: Circular lists, Stack as a circular list, Queue as a circular list, Primitive operations on circular lists, doubly linked lists | |
| 5 | Trees and Graphs Binary trees, operations on binary trees, Applications of binary trees, Binary tree representation, Node representation of binary tree, Internal and external nodes, Implicit array representation of binary trees, Choosing a binary tree representation, Binary tree traversal in C, Threaded binary trees. Graphs: Definitions, Application of graphs, and C representation of graphs, Traversal methods for graphs, Depth first traversal, and Breadth first traversal. | 10 Hrs |
| Unit III | | |
| 6 | Sorting Bubble Sort, Quick Sort, Selection Sort, Tree Sorting: Binary Tree Sort, Heap Sort Insertion Sorts: Simple Insertion, Shell Sort, Address Calculation Sort, Merge and Radix Sort. | 5 Hrs |
| 7 | Searching Basic Search Techniques: Algorithmic notation, Sequential searching, Searching an ordered table, Indexed sequential search, Binary search, Interpolation search, Tree searching: Inserting into a Binary Search Tree, Deleting from a Binary Search Tree, Hashing: Resolving hash clashes by open addressing, Choosing a hash function | 5 Hrs |
| Text Books : 1. Yedidyah Langsam, Augenstein, M.J. and Tenenbaum, Data Structures using C and C++, Second Edition, Pearson Education Asia, 2006 | | |
| Reference Books: 1. Weiss, M.A., Data Structures and Algorithm Analysis in C, 2, Pearson Education Asia, 1997 2. Evaluation Scheme

1. In Semester Assessment (ISA)

| Assessment | Marks |
|--------------|------------|
| ISA- 1 | 20 |
| ISA- 2 | 20 |
| Activities | 10 |
| ISA | 50 |
| ESA | 50 |
| Total | 100 |

2. End Semester Assessment (ESA)

| UNIT | 8 Questions to be set of 20 Marks Each | Chapter Nos. | Instructions |
|------|--|--------------|------------------------------------|
| I | 3 Questions to be set of 20 Marks Each | 1, 2, 3 | Any 2 questions are to be answered |
| II | 3 Questions to be set of 20 Marks Each | 4,5 | Any 2 questions are to be answered |
| III | 2 Questions to be set of 20 Marks Each | 6,7 | Any 1 question is to be answered |

Activities

| # | TOPICS | ACTIVITY | WEIGHTAGE |
|----|---|--|-----------|
| 1. | Arrays, functions, pointers, structures and dynamic memory allocation in C. | Program to demonstrate the following for a given set of elements: <ul style="list-style-type: none"> • Array as a parameter • Structure as a parameter • Process of allocating memory during program execution | 10 |
| 2. | Stack data structure | Program to illustrate implementation of stack using the following: <ul style="list-style-type: none"> • Array • Structures • Functions and pointers | 10 |
| 3. | Applications of stack | Implement the two applications of stack. <ul style="list-style-type: none"> • Postfix expression evaluation Conversion of Infix expression to Postfix expression | 10 |
| 4. | Recursion | Write recursive functions in C program for the following: <ul style="list-style-type: none"> • Simple recursive functions: Tower of Hanoi, factorial, Fibonacci series. • Reverse a stack using recursion Sort a stack using recursion | 10 |
| 5. | Queue and Circular Queue concepts | Program to illustrate implementation of queue and circular queue using array | 10 |

| | | | |
|-------|--|---|-----|
| 6. | Queue. | Implementation of queue using Linked list | 10 |
| 7. | Singly Linked List and Circular Linked List. | Implementation of singly and circular linkedlist. | 10 |
| 8. | Doubly Linked List | Perform all the operations on doubly linkedlist | 10 |
| 9. | Searching and sorting techniques. | Implementation of the following searching and sorting techniques: Linear search, binary search, insertion sort, heap sort, quick sort. | 10 |
| 10. | Tree and graph traversal | <ul style="list-style-type: none"> • Construction and traversal of binary search tree • Program to demonstrate the graph traversal. | 10 |
| Total | | | 100 |

| Program: Master of Computer Applications | | Semester: I |
|---|--|-------------------------------|
| Course Title: Database Management System | | Course Code: 20ECAC702 |
| L-T-P : 3-0-1 | Credits: 4 | Contact Hours: 5 |
| ISA Marks: 50 | ESA Marks: 50 | Total Marks: 100 |
| Teaching Hours: 40+24 | Examination Duration: :3 Hrs | |
| Chapter No. | Content | Hrs |
| Unit I | | |
| 1 | Introduction to Databases Introduction; An example; Characteristics of Database approach; Actors on the scene; Workers behind the scene; Advantages of using DBMS approach; A brief history of database applications; When not to use a DBMS. Data models, schemas and instances; Three-schema Architecture and Data Independence; Database Languages and Interfaces. | 5 Hrs |
| 2 | Conceptual Data Modeling Using Entities and Relationships Using High Level Conceptual Data Models for database Design; A Sample Database Application, Entity Types, Entity Sets, Attributes and Keys, Relationship Types, Relationship Sets, Roles and Structural Constraints, Weak Entity Types, Refining the ER Design for the COMPANY Database, ER Diagram, Naming Conventions and Design Issues, Relationships Higher than Two. | 5 Hrs |
| 3 | The Basic (Flat) Relational Model and Relational Algebra Relational Model Concepts; Relational Model Constraints and Relational Database Schemas; Update Operations, Transactions and dealing with constraint violations. Unary Relational Operations: SELECT and PROJECT; Relational Algebra Operations from Set Theory; Binary Relational Operations: JOIN and DIVISION; Additional Relational Operations; Examples of Queries in Relational Algebra. Relational Database Design using ER-to-Relational Mapping. | 6 Hrs |
| Unit II | | |
| 4 | SQL SQL Data Definition and Data Types; Specifying Constraints in SQL; Basic Retrieval Queries in SQL; Insert, Delete and Update statements in SQL; More Complex SQL Retrieval Queries, Specifying Constraints as Assertions and Action as Triggers; Views (Virtual Tables) in SQL; Schema Change Statements in SQL; Database programming issues and techniques. | 7 Hrs |
| 5 | Database Design Informal Design Guidelines for Relation Schemas; Functional Dependencies; Normal Forms Based on Primary Keys; General Definitions of Second and Third Normal Forms; Boyce-Codd Normal Form; Multivalued Dependencies and Fourth Normal Form; Join Dependencies and Fifth Normal Form. | 6 Hrs |

| | | |
|--|---|--------------|
| 6 | Chapter 6: Object and Object-Relational Databases Overview of Object Database Concepts, Object-Relational Features: Object Database Extensions to SQL. | 3 Hrs |
| Unit III | | |
| 6 | Foundations of Database Transaction Processing and Concurrency Control Introduction to Transaction Processing; Transaction and System Concepts; Desirable Properties of Transactions; Characterizing Schedules Based on Recoverability; Characterizing Schedules Based on Serializability; Transaction Support in SQL. Two-Phase Locking Techniques for Concurrency control; Concurrency control based on Timestamp Ordering; Multiversion Concurrency control Techniques; Validation Concurrency Control Techniques; Granularity of Data Items & Multiple Granularity Locking; Using Locks for Concurrency Control in Indexes; Other Concurrency Control Issues. | 4 Hrs |
| 7 | Introduction to Database Recovery Protocols Recovery Concepts, NO-UNDO/REDO Recovery Based on Deferred update; Recovery Techniques based on Immediate update; Shadow paging; The ARIES Recovery Algorithm; Recovery in Multi database Systems; Database Backup and Recovery from Catastrophic Failures. | 4 Hrs |

|------|--|--------------|------------------------------------|
| I | 3 Questions to be set of 20 Marks Each | 1, 2, 3 | Any 2 questions are to be answered |
| II | 3 Questions to be set of 20 Marks Each | 4,5,6 | Any 2 questions are to be answered |
| III | 2 Questions to be set of 20 Marks Each | 7,8 | Any 1 question is to be answered |

Activities

| # | Topics | Activity | Weightage |
|--------------|---|--|------------|
| 1 | Conceptual Data Modeling Using Entities and Relationships | Draw the ER diagrams for the following databases i. Student-Enrollment Data base ii. Insurance Database iii. Company Database iv. Movie Database | 15 |
| 2 | The Basic (Flat) Relational Model and Relational Algebra | Convert the ER diagrams mentioned in activity 1 to Relational Schema diagrams | 15 |
| 3 | SQL | SQL query implementation for following schemas * i. Student-Enrollment Data base ii. Insurance Database iii. Company Database iv. Movie Database | 50 |
| 4 | Database Design | Assignments on Normalization | 10 |
| 5 | Transaction Processing | Assignments on Transaction Processing. | 10 |
| Total | | | 100 |

Schemas *

i) Student-Enrollment Database.

Consider the following relations:

Student(snum: integer, sname: string, major: string, level:

string, age: integer) Class(name: string, meets at: string, room:

string, fid: integer) Enrolled(snum: integer, cname: string)

Faculty(fid: integer, fname: string, deptid: integer)

Enrolled has one record per Student-class pair such that the student is enrolled in the class. Write the following queries in SQL.

1. Create the above tables by properly specifying all the integrity constraints.
2. Insert at least five tuples into each table.
3. Find the names of all Juniors (level=JR) who are enrolled in a class taught by I.John.
4. For each level, print the level and the average age of students for that level.
5. Find the names of students not enrolled in any class.

ii) Insurance Database.

Consider the insurance database given below.

PERSON (driverid: String, name: String, address:

String) CAR (regno: String, model: String, year: Int)

ACCIDENT (repno: Int, dat: Date, location:

String) OWNS (driverid: String, regno: String)

PARTICIPATED (driverid: String, regno: String, repno: Int,

damageamt: Int) Write the following queries in SQL.

1. Create the above tables by properly specifying the integrity constraints.
2. Enter at least five tuples for each relation.
3. Demonstrate how you
 - * Update the damage amount for the car with a specific Regno in the accident with report number 12 to 25000
 - * Add a new accident to the database
4. Find the total number of people who owned cars that were involved in accidents in 2002.
5. Find the number of accidents in which cars belonging to a specific model were involved.

iii) Company Database:

- The company is organized into departments. Each department has a unique name, a unique number, and a particular employee who manages the department. We keep track of the start date when that employee began managing the department. A department may have several locations.
- A department controls a number of projects, each of which has a unique name, a unique number, and a single location.
- We store each employee's name, Social Security number, address, salary, gender) and birth date. An employee is assigned to one department, but may work on several projects, which are not necessarily controlled by the same department. We keep track of the current number of hours per week that an employee works on each project. We also keep track of the direct supervisor of each employee (who is another employee).
- We want to keep track of the dependents of each employee for insurance purposes. We keep each dependent's first name, gender, birth date, and relationship to the employee.

Write the following queries in SQL for the Company database

1. To display the details of all the Employee whose first name starts with "S".
2. To display name and address of all employee who work for "MCA" department.
3. To display the names of employee who do not have supervisor.
4. To retrieve First name and salary of all employees in department 5 whose salary is between Rs.30,000 and 40,000.
5. For each department , to retrieve the department number, the number of employees in that department and their average salary.

iv) Movie Database

Movie Database. Data requirements of movie industry are captured.

• Each movie is identified by title and year of release. Each movie has length in minutes and classified under one genres (like action, horror etc.). Each movie has a plot outline.

• Production companies are identified by name and each has an address. A production company produces one or more movies.

• Actors are identified by id. Other details like name and date of birth of actors are also stored. Each actor acts in one or more movies. Each actor has a role in movie.

• Directors are identified by id. Other details like name and date of birth of directors are also stored. A Director can act in a movie (including the one that he or she may also direct). Each director directs one or more movies.

• Each movie has one or more actors and one or more directors and is produced by a production company.

Solve the following queries in SQL:-

- a. List the details of horror movies released in 2012 and directed by more than 2 directors.
- b. List the details of actors who acted in movies having same titles but released before 2000 and after 2010.
- c. List the details of production companies producing maximum movies.
- d. List the details of movies where director and actor have same date of birth.
- e. Retrieve the names of directors directed all the movies produced by any one production company

| Program: Master of Computer Applications | | Semester: I |
|---|--|-------------------------------|
| Course Title: Computer Networks | | Course Code: 21ECAC701 |
| L-T-P : 3-0-1 | Credits: 4 | Contact Hours: 5 |
| ISA Marks: 50 | ESA Marks:50 | Total Marks: 100 |
| Teaching Hours: 40+24 | Examination Duration: :3 Hrs | |
| Chapter No. | Content | Hrs |
| Unit I | | |
| 1 | Computer Networks and the Internet Internet, The Network Edge and Core, Delay, Loss, and Throughput in Packet-Switched Networks, Protocol Layer and Service Models: OSI and TCP/IP, Networks Attacks. | 5 Hrs |
| 2 | Application Layer Principles of Network Applications, HTTP, SMTP, DNS, DHCP, Peer-to-Peer Applications | 5 Hrs |
| 3 | Transport-Layer Services Introduction, Multiplexing and Demultiplexing, Connectionless Transport, Principles of Reliable Data Transfer Protocol, Connection-Oriented and Connectionless Transport, Principle of Congestion Control, TCP Congestion Control. | 6 Hrs |
| Unit II | | |
| 4 | Network Layer – Data Plane Introduction to Data and Control Plane, Virtual Circuit and Datagram Networks, Internet Protocol: Datagram Format, Fragmentation, IP Addressing, NAT, IPv6 | 6 Hrs |
| 5 | Network Layer- Routing Algorithms The Link-State (LS) Routing Algorithm, The Distance-Vector (DV) Routing Algorithm, Hierarchical Routing, Routing in the Internet ,intra-AS Routing in the Internet: RIP , Intra-AS Routing in the Internet: OSPF, Inter-AS Routing: BGP. | 6 Hrs |
| 6 | Data Link Layer Introduction to the Link Layer, Error-Detection and -Correction Techniques : Parity Checks, Check summing Methods, Cyclic Redundancy Check (CRC),Hamming Code | 4 Hrs |
| Unit III | | |
| 7 | Data Link Layer (Continued..) Multiple Access Links and Protocols: Channel Partitioning Protocols, Random Access Protocols: Aloha, Slotted Aloha, CSMA, CSMA/CD, CSMA/CA, Taking-Turns Protocols, The Link-Layer Protocol for Cable Internet Access, Link-Layer Addressing and ARP, Ethernet and LAN standards | 4 Hrs |

| | | |
|---|--|--------------|
| 8 | Security In Computer Networks What is Network Security, Principles of cryptography, Message Integrity and Digital Signatures, End point authentication, Securing E-Mail, Securing TCP Connections, Network Layer Security IPSec and VPN, Operational Security: Firewalls and Intrusion detection systems | 4 Hrs |
| Text Books : 1. Computer Networking, A Top-Down Approach, by J.F.Kurose, K.W.Ross, 7th edition Pearson Education, 2017. | | |
| Reference Books: 1. TCP/IP Protocol Suite ,4th MGH 2010 By B. A. Forouzan. | | |

| Activities | | | |
|-------------------|---|--|------------------|
| # | Topics | Activity | Weightage |
| 1 | Introduction to Data Communications | Overview of networks and layered communications | 10 |
| 2 | Physical Layer: Cable constructions and testing of different cable connectivity | 1. Practice the cable construction for twisted pairs and fiber optics. 2. Test the configured cable connectivity. | 15 |
| 3 | Physical Layer: Analyzing the packet content using network monitoring tools | 1. Understanding of packet capture using network interface. 2. Analyze the content of the packet using Wireshark tool correlated with OSI model. | 15 |
| 4 | Physical Layer ,Data Link Layer: Understanding of network devices and protocol simulation tool | 1. Understanding of different network devices used for data communication. 2. Illustrate packet tracer simulation tool for design of the network. | 15 |
| 5 | Data Link Layers: ARQ Protocol implementation using C Program. | Implement the different supported ARQ protocols implementation using C Program. | 15 |
| 6 | Network Layer: Network Operations and troubleshooting | 1. Outline the network properties and testing the network connectivity. 2. Explain the addressing protocols. | 15 |
| 7 | Network Layer: | Simulation and Implementation of Routing Protocols. | 15 |
| Total | | | 100 |

Evaluation Scheme

| Course Title: Operating Systems | | Course Code: 21ECAC702 |
| L-T-P : 3-0-1 | Credits: 4 | Contact Hours: 5 |
| ISA Marks: 50 | ESA Marks:50 | Total Marks: 100 |
| Teaching Hours: 40+24 | Examination Duration: :3 Hrs | |
| Chapter No. | Content | Hrs |
| Unit I | | |
| 1 | Introduction to Operating Systems, System structures What operating systems do; Computer System organization; Computer System architecture; Operating System structure; Operating System operations; Resource Management; Security and Protection; Virtualization, Distributed systems, Kernel data structures, Computing environments; Operating System Services; User - Operating System interface; System calls; System services; Linkers and Loaders; Operating System design and implementation; Operating System structure; Building and Booting an Operating System, Operating System Debugging | 6 Hrs |
| 2 | Process Management Process Concept, Process scheduling Operation on Processes, Interprocess communication, Multi-Threaded Programming: Overview; Multicore Programming, Multithreading models; Thread Libraries; Threading issues. CPU Scheduling: Basic concepts; Scheduling criteria Scheduling algorithms Multiple-Processor scheduling; Thread scheduling, Algorithm Evaluation. | 4 Hrs |
| 3 | Process Synchronization Synchronization: The Critical section problem; Peterson's solution; Synchronization hardware; Semaphores; Classical problems of synchronization; Monitors | 6 Hrs |
| Unit II | | |
| 4 | Deadlocks Deadlocks: System model; Deadlock in Multithreaded application, Deadlock characterization; methods for handling deadlocks; Deadlock prevention; Deadlock avoidance; Deadlock detection and recovery from deadlock | 6 Hrs |
| 5 | Memory Management Memory Management Strategies: Background; Swapping Contiguous memory allocation; Paging Structure of page table; Segmentation Virtual Memory Management: Background; Demand paging; Copy-on-write; Page replacement Allocation of frames; Thrashing. | 6 Hrs |
| 6 | Implementation of File System File System: File concept; Access methods Directory structure, File system mounting File sharing; Protection. Implementing File System: File system structure File system implementation; Directory implementation; Allocation methods; Free space management | 4 Hrs |
| Unit III | | |

| | | |
|----------|--|--------------|
| 7 | Secondary Storage Structures, Protection Mass storage structures; Disk structure; Disk attachment; Disk scheduling; Disk management; Swap space management. Protection: Goals of protection, Principles of protection Domain of protection, Access matrix Implementation of access matrix, Access control, Revocation of access rights, Capability-Based systems | 4 Hrs |
| 8 | Case study – Linux operating system Design principles Kernel modules, Process management Scheduling, memory Management File systems, Input & output, Interprocess Communication. | 4 Hrs |

|------|--|--------------|------------------------------------|
| I | 3 Questions to be set of 20 Marks Each | 1,2,3, | Any 2 questions are to be answered |
| II | 3 Questions to be set of 20 Marks Each | 4, 5,6, | Any 2 questions are to be answered |
| III | 2 Questions to be set of 20 Marks Each | 7,8 | Any 1 question is to be answered |

| Activities : Implement the following programs using C programs | | | |
|--|------------------------------|--|-----------|
| # | Topics | Activity | Weightage |
| 1. | UNIX Commands System Calls. | Program to simulate Unix commands and System calls. | 10 |
| 2. | Process Synchronization | Program to simulate the following non-preemptive CPU scheduling algorithms to find turnaround time and waiting time. a) FCFS b) SJF c) Round Robin (pre-emptive) d) Priority | 10 |
| 3. | | Program to simulate multi-level queue scheduling algorithm considering the following scenario. All the processes in the system are divided into two categories – system processes and user processes. System processes are to be given higher priority than user processes. Use FCFS scheduling for the processes in each queue. | 10 |
| 4. | Process Synchronization | Program to simulate and Producer Consumer Problem using semaphores | 10 |
| 5. | | Program to simulate Dining Philosopher's problem | 10 |
| 6. | Memory Management Techniques | Program to simulate the following contiguous memory allocation techniques a) Worst-fit b) Best-fit c) First-fit | 10 |
| 7. | | Program to simulate paging technique of memory management. | 10 |
| 8. | Deadlock Avoidance | Program to implement Banker's algorithm. | 10 |
| 9. | Disk Scheduling | Program to simulate disk scheduling algorithms a) FCFS b) SCAN c) C-SCAN | 10 |
| 10. | Page replacement algorithms | Program to simulate Unix commands and System calls. | 10 |
| Total | | | 100 |

| Program: Master of Computer Applications | | Semester: II |
|---|---|-------------------------------|
| Course Title: Cloud Computing | | Course Code: 20ECAC709 |
| L-T-P : 3-0-1 | Credits: 4 | Contact Hours: 5 |
| ISA Marks: 50 | ESA Marks: 50 | Total Marks: 100 |
| Teaching Hours: 40+24 | Examination Duration: 3 Hrs | |
| Chapter No. | Content | Hrs |
| Unit I | | |
| 1 | Introduction, Parallel and distributed systems Network-centric computing and network centric content, peer-to-peer systems, Cloud computing basics, delivery models and services, Ethical issues, cloud vulnerabilities, major challenges; parallel computing, parallel computer architecture, Distributed systems, communication protocol and process coordination, logical clocks, message delivery rules, casual delivery, Concurrency, atomic actions, consensus protocols, modularity: client-server paradigm. | 6 Hrs |
| 2 | Cloud Infrastructure Cloud computing at Amazon, cloud computing: the Google perspective, Microsoft windows Azure and online services; open-source software platforms for private clouds; Cloud storage diversity and vendor lock-in; Cloud computing interoperability: the intercloud; Energy use and ecological impact of large-scale data centers; Service and compliance level agreements; User experience; Software licensing. | 6 Hrs |
| 3 | Cloud Computing: Applications and Paradigms Challenges for cloud computing; Existing cloud applications and new application opportunities; Architectural styles for cloud applications; Workflows: Coordination of multiple activities; The MapReduce programming model; Case studies. | 4 Hrs |
| Unit II | | |
| 4 | Cloud Resource Virtualization Virtualization; Layering and virtualization; Virtual machine monitors; Virtual machines; Performance and security isolation; Full virtualization and Para virtualization; Hardware support for virtualization; Case study; Optimization of network virtualization; vBlades; A performance comparison of virtual machines; Software fault isolation; | 6 Hrs |
| 5 | Cloud Resource Management and Scheduling Policies and mechanisms for resource management; Applications of control theory to task scheduling on a cloud; Stability of a two-level resource allocation architecture; Feedback control based on dynamic thresholds; Coordination of specialized autonomic performance managers; A utility-based model for cloud-based web services; Resource bundling; Scheduling algorithms for computing clouds; Fair queuing; Resource management and dynamic application scaling. | 6 Hrs |
| 6 | Networking Support | 4 Hrs |

| | | |
|---|---|--------------|
| | Packet-switched networks; The Internet; Internet migration to IPV6; The transformation of the Internet; Web access and the TCP congestion control window; Network resource management; Interconnection networks for computer clouds; Content-delivery networks; Overlay networks and small-world networks. | |
| Unit III | | |
| 7 | Storage Systems The evolution of storage technology; Storage models, file systems and databases; Distributed file systems: The precursors; General parallel file system; Google File System; Apache Hadoop; Locks and Chubby: A locking service; Transaction processing and NoSQL and databases; BigTable; Megastore. | 4 Hrs |
| 8 | Cloud Security Cloud security risks; Security: The top concern for cloud users; Privacy and privacy impact assessment; Trust; Operating system security; Virtual machine security; Security of virtualization; Security risks posed by shared images; Security risks posed by a management OS; A trusted virtual machine monitor. | 4 Hrs |
| Text Books : 1. Dan C. Marinescu, Cloud Computing: Theory and Practice, Morgan Kaufmann publishers, Second Edition, 2018. | | |

Dr. Kumar Sourabh, Cloud Computing, 2nd Edition, Wiley India, 2011. | | |

| Activities | | | |
|------------|--|---|-----------|
| # | Topics | Activity | Weightage |
| 1 | Introduction, Parallel and distributed systems | <p>Compare the three cloud computing delivery models, SaaS, PaaS, and IaaS, from the point of view of the application developers and users. Discuss the security and the reliability of each one of them. Analyze the differences between the PaaS and the IaaS.</p> <p>An IT company decides to provide free access to a public cloud dedicated to higher education. Which one of the three cloud computing delivery models, SaaS, PaaS, or IaaS should it embrace and why? What applications would be most beneficial for the students? Will this solution have an impact on distance learning? Why?</p> <p>What is in your opinion the critical step in the development of a systematic approach to all-or-nothing atomicity? What does a systematic approach means? What are the advantages of a systematic versus an ad-hoc approach to atomicity?</p> | 15 |
| 2 | Cloud Infrastructure | <p>Several desirable properties of a large-scale distributed system includes transparency of access, location, concurrency, replication, failure, migration, performance, and scaling. Analyze how each one of these properties applies to AWS.</p> <p>Demonstration Cloud services using AWS or Azure or Google Cloud.</p> <ul style="list-style-type: none">• Compare the Oracle Cloud offerings (see https://cloud.oracle.com) with the cloud services provided by Amazon, Google, and Microsoft. | 15 |
| 3 | Cloud Computing: Applications and Paradigms | <p>Download and install the Zookeeper from the site http://zookeeper.apache.org/. Use the API to create the basic workflow patterns or Use the AWS CloudFormation service to create the basic workflow patterns.</p> <p>Search the web for reports of cloud system failures and discuss the causes of each incident.</p> | 10 |

| | | | |
|---|--|--|----|
| | | Research the power consumption of processors used in mobile devices and their energy efficiency. Rank the components of a mobile device in terms of power consumption. Establish a set of guidelines to minimize the power consumption of mobile applications. | |
| 4 | Cloud Resource Virtualization | <p>Virtualization simplifies the use of resources, isolates users from one another, supports replication and mobility, but exacts a price in terms of performance and cost. Analyze each one of these aspects for: (i) memory virtualization, (ii) processor virtualization, and (iii) virtualization of a communication channel.</p> <p>Virtualization of the processor combined with virtual memory management pose multiple challenges; analyze the interaction of interrupt handling and paging.</p> <ul style="list-style-type: none"> In Section 5.6 we state that a VMM for a processor can be constructed if the set of sensitive instructions is a subset of the privileged instructions of that processor. Identify the set of sensitive instructions for the x86 architecture and discuss the problem each one of these instruction poses. | 15 |
| 5 | Cloud Resource Management and Scheduling | <p>Analyze the benefits and the problems posed by the four approaches for the implementation of resource management policies: control theory, machine learning, utility based, market-oriented.</p> <p>Can optimal strategies for the five classes of policies, admission control, capacity allocation, load balancing, energy optimization, and QoS guarantees be actually implemented in a cloud? Support your answer with solid arguments.</p> <ul style="list-style-type: none"> Multiple controllers are probably necessary due to the scale of the cloud. Is it beneficial to have system and application controllers? Justify your answers. | 15 |
| 6 | Networking Support | <p>Implementation</p> <p>Simple IPC (Client Server Communication)</p> <p>Simple chat server</p> <ul style="list-style-type: none"> multi-threaded File Server | 10 |
| 7 | Storage Systems | Analyze the reasons for the introduction of storage area networks (SANs) and their properties. | 10 |

| | | | |
|--------------|----------------|--|------------|
| | | <p>Block virtualization simplifies the storage management tasks in SANs. Provide solid arguments in support of this statement.</p> <p>The designers of the Google file system (GFS) have re-examined the traditional choices for a file system. Discuss observations regarding these choices that have guided the design of GFS.</p> | |
| 8 | Cloud Security | Write a survey paper on cloud computing security: Issues, threats, and solutions | 10 |
| Total | | | 100 |

Evaluation Scheme

1. In Semester Assessment (ISA)

| | Assessment | Marks | |

| ISA Marks: 50 | ESA Marks:50 | Total Marks: 100 |
| Teaching Hours: 40+24 | Examination Duration: :3 Hrs | |
| Chapter No. | Content | Hrs |
| Unit I | | |
| 1 | Types of digital data and concept of big data Classification of digital data: Unstructured, Semi-structured, and Structured; Characteristics of data, Evolution of big data, and definition of big data: 5 Vs, challenges with big data, typical data warehouse environment: Hadoop Environment | 4 Hrs |
| 2 | Big Data Analytics What is big data analytics? What big data analytics is not? Classification of analytics, Top challenges facing big data, Importance of big data analytics, Need of technology to meet big data challenges, Data science: business acumen skills, technology expertise, mathematics expertise, Data scientist, terminologies used in big data environments, BASE, top analytics tools. | 5 Hrs |
| 3 | Big data Technology landscape Not Only SQL (NoSQL): Types of NoSQL, Advantages of NoSQL, Use of NoSQL in industry, NewSQL, Hadoop: features, key advantages, versions, overview of Hadoop ecosystem, Hadoop distributions, Hadoop versus SQL, Cloud-based Hadoop solutions | 6 Hrs |
| Unit II | | |
| 4 | Hadoop distributed file system Introduction, Why Hadoop, RDBMS versus Hadoop, distributed computing challenges: hardware failure, how to process gigantic store of data, history of Hadoop, Hadoop overview, use case of Hadoop, Hadoop distributors, Hadoop Distributed File System (HDFS): Name node, Data node, secondary Name node, anatomy of file read, anatomy of file write; replica placement, processing of data with Hadoop, Managing resources an applications with Hadoop, Interacting with Hadoop ecosystem. | 8 Hrs |
| 5 | MongoDB and query language Introduction, Why Hadoop, RDBMS versus Hadoop, distributed computing challenges: hardware failure, how to process gigantic store of data, history of Hadoop, Hadoop overview, use case of Hadoop, Hadoop distributors, Hadoop Distributed File System (HDFS): Name node, Data node, secondary Name node, anatomy of file read, anatomy of file write; replica placement, processing of data with Hadoop, Managing resources an applications with Hadoop, Interacting with Hadoop ecosystem. | 4 Hrs |

| | | |
|---|--|-------|
| 6 | Cassandra and MapReduce programming Introduction, Apache Cassandra, features of Cassandra, data types, CQLSH, Keyspaces, CRUD operations, Introduction to MapReduce, Mapper, Reducer, Combiner, partitioner, searching, Sorting, and compression. | 4 Hrs |
| Unit III | | |
| 6 | Hive and query language Introduction, What is Hive, History of Hive and recent releases of Hive, Hive integration and work flow, Hive data units; Hive architecture, Hive data types, Hive file format, Hive Query Language (HQL): DDL, DML, Hive shell, database, tables, Partitions, Bucketing, Views, Sub-query: RCFile implementation, SERDE, User defined function. | 4 Hrs |
| 7 | PIG Introduction, What is PIG, Key features of PIG; The anatomy of PIG, PIG philosophy, use case for PIG: ETL processing, PIG Latin overview, Data types in PIG, Running PIG, execution modes of PIG, HDFS commands, relational operators, eval function, complex data types, piggy bank, user defined function | 4 Hrs |

| Course Title: Programming C# with .Net | | Course Code: 22ECAC801 |
| L-T-P : 4-0-0 | Credits: 4 | Contact Hours: 4 |
| ISA Marks: 50 | ESA Marks:50 | Total Marks: 100 |
| Teaching Hours: 50 | Examination Duration: :3 Hrs | |
| Chapter No. | Content | Hrs |
| Unit I | | |
| 1 | The Philosophy of .NET Understanding the Previous State of Affairs, The .NET Solution, Introducing the Building Blocks of the .NET Platform (CLR,CTS, and CLS), The Role of the .NET Base Class Libraries, What C# Brings to the Table, An Overview of .NET Assemblies, The Role of the Common Intermediate Language , The Role of .NET Type Metadata, The Role of the Assembly Manifest, Compiling CIL to Platform –Specific Instructions, Understanding the Common Type System, Intrinsic CTS Data Types, Understanding the Common Languages Specification, Understanding the Common Language Runtime, The Assembly/Namespace/Type Distinction, Using ildasm.exe, Deploying the .NET Runtime, The Platform independent nature of .NET, Installing the .NET Framework, C# Command- Line Compiler, Building C# Applications using csc.exe, Working with csc.exe Response Files. | 8 Hrs |
| 2 | C# Language Fundamentals. The Anatomy of a Simple C# Class, An Interesting Aside : The System.Environment Class, Defining Classes and Creating objects, The System.Console Class, Establishing Member Visibility, Default Values of Class Member Variables, Member Variable Initialization Syntax, Defining Constant Data, Defining Read-only fields, Understanding thestatic keyword, Method Parameter Modifiers, Iteration Constructs, Decision Constructs and the Relational/Equality Operators, Understanding Value Types and Reference Types, Understanding Boxing and Unboxing Operations, Working with .NET Enumerations, The Master Class: System.Object, Overriding some default behaviours of System.Object, The System Data types(and C# Shorthand notation), The System.String data types, The role of System.Text.StringBuilder, .NET Array Types, Understanding C# Nullable Types, Defining Custom Namespaces | 6 Hrs |
| 3 | Object-Oriented Programming with C# Understanding the C# Class Type, Reviewing the Pillars of OOP, The First Pillar: C#'s Encapsulation Services, The Second Pillar: C#'s Inheritance Support, Programming for Containment/Delegation, The Third Pillar: C #'s Polymorphic Support, C# Casting rules, Understanding C# Partial types, Documenting C# Source Code via XML. | 6 Hrs |
| Unit II | | |

| | | |
|-----------------|---|-------|
| 4 | Object Lifetime and Exceptions Handling. Classes, Objects and References, the basics of Object Lifetime, The role of Application Roots, Understanding Object Generations, System.GC type, Building Finalizable Objects, Building Disposable Objects, Building Finalizable and Disposable types. Ode to Errors, Bugs, and Exceptions, The Role of .NET Exception Handling, The Simplest possible example, Configuring the state of an exception, System — Level Exception (System. System Exception), Application-Level Exception (System. Application Exception), Processing Multiple Exception, The Finally Block, The result of unhandled exceptions, Debugging Unhandled exceptions using VS. NET. | 8 Hrs |
| 5 | Interfaces and Collections Defining Interfaces in C#, Implementing an Interface in C#, Contrasting Interfaces to Abstract Base Classes, Invoking Interface Members at the Object Level, Interfaces As Parameters, Interfaces As Return Values, Arrays of Interfaces Types, Understanding Explicit Interface Implementation, Building Interface Hierarchies, Implementing Interfaces Using Visual Studio 2005, Building Enumerable Types (IEnumerable and IEnumerator), Building Cloneable Objects(ICloneable), Building Comparable Objects(IComparable), The Interfaces of the System.Collections Namespace, The Class Types of System.Collections.. | 6 Hrs |
| 6 | Callback Interfaces, Delegates, and Events, Advanced C# Techniques Understanding Callback Interfaces, Understanding the .NET Delegate type, Defining a Delegate in C#, The System.multicastDelegate and System.Delegate Base Classes, Investigating a Delegate Object, Delegates as Parameters, Understanding C# Events Building a Custom Indexer, Internal Representations of Type Indexers: Final Details, Understanding Operator Overloading Binary Operators, Unary Operators, Equality Operators, Comparison Operators, Understanding Custom Type Conversions, The Advanced Key words of C#, C# Preprocessor Directives. | 6 Hrs |
| Unit III | | |
| 7 | Records Background, Defining a Record, Nondestructive Mutation, Property Validation, Calculated Fields and Lazy Evaluation, Primary Constructors, Records and Equality Comparison | 5 Hrs |
| 8 | Programming with Windows Forms and Database Access with MS SQL Server Controls, Building Custom Windows Forms Controls, Defining Custom Events, Defining Custom Properties, Overview of Data Access, Creating database connections, connecting to MSSQL Server, Dataset and Data table features, using inline SQL Statements, using stored procedures , Executing select commands, SQL transaction | 5 Hrs |

| Program: Master of Computer Applications | | Semester: III |
|---|---|-------------------------------|
| Course Title: C# .NET Lab | | Course Code: 22ECAP801 |
| L-T-P : 0-0-1.5 | Credits: 1.5 | Contact Hours: 3 |
| ISA Marks: 80 | ESA Marks:20 | Total Marks: 100 |
| Teaching Hours: 36 Hrs | Examination Duration: :3 Hrs | |
| Expt. No. | Demonstration | Hrs |
| 1 | C# program to demonstrate C# programming constructs Arrays, Strings, Enumerations, Structures, Methods and Namespaces. | 1 |
| 2 | C# program to demonstrate Pillars of OOP - Encapsulation, Inheritance, Polymorphism | 1 |
| 3 | C# program to demonstrate Exception Handling and Object Lifetime | 1 |
| 4 | C# program to demonstrate Interfaces & members of Systems. Collections namespace. | 1 |
| 5 | C# program to demonstrate Delegates, Events & Operator Overloading | |
| | Exercise | |
| 1 | a) Write a C# program which provides methods for calculating the HYPOTENUSE of a triangle & AREA of a circle. The methods should demonstrate the boxing & unboxing techniques. b) Write a C# program to convert a Decimal number to its binary equivalent and vice versa using methods. The program should illustrate the use of reference variables and output variables. | 1 |
| 2 | Write a C# program to create a shopping list of electronic goods & another of books. Provide options to add item at specified location, to append an item, to delete an item. The shopping lists have to be merged & sorted alphabetically. | 1 |
| 3 | Design a C# structure CUSTOMER, with data members - name, account number, balance & account status (enumerated type – current /overdue /delinquent). Write a C# program to implement the above through structure variables & display customer's details categorized by account status. | 1 |

| | | |
|---|--|---|
| 4 | <p>Design an abstract class BankAccount with necessary data members. Derive the following classes. BankAccount</p> <pre> graph TD BankAccount --> Savings BankAccount --> Fixed BankAccount --> Current Fixed --> Short Fixed --> Long </pre> <p>The Savings class provides with cheque book facility, withdrawal & deposit facility. The Current class provides only withdrawal & deposit facility. The Fixed class is derived by 2 classes Short term (1 to 2 years @ 8%) & Long term (3 to 5 years @ 10%). Write a driver program for this</p> | 1 |
| 5 | Design an interface in C# for displaying product details like Product List, Product Features, Product color & price. Implement the interface for the products Car & Mobile Phones. Write a driver program for this. | 2 |
| 6 | Design a C# class Point (with 2 integer members x & y & necessary data members). The class should overload binary operators (+, -), unary operators (++/--), equality operators (==, !=) & comparison operators (<, >). Implement structured exceptional handling for your class. Write a driver program for this. | |
| 7 | Design a C# class RESULT to calculate the Internal Assessment marks of a student (minor1 + minor2 + assignment). Use delegate feature for this application. Write a driver program for this. | |
| | Structured Enquiry | |
| 1 | Implement an windows form application for demonstrating CRUD operations using SQL server as backend database. | 2 |

Evaluation:

Students Assessment through CIA (80%) and ESA (20%)

| Assessment | Weightage in Marks |
|--|--------------------|
| Demonstration | 20 |

Students can use the following tools in web and mobile applications as well as product developments:

- Struts, Spring, Hibernate and JPA
- Machine Learning & Deep Learning
- JAXB and Apache Axis 2/Java
- JSP, Servlets, JDBC, EJB, JMS, JTA and JUnit
- Apache Tomcat, JBoss and GlassFish
- JavaScript, JSF, GWT and jQuery
- Eclipse, Netbeans and JBoss tools
- TestNG
- jBPM and Drools
- JCR

Objectives:

Help students to utilize and strengthen the knowledge of java which they have learnt in previous semester.

Methodology:

Students are asked to make a team of 3-4 members and can choose the different categories of projects like desktop applications, web applications, mobile application and distributed application and work once it is approved by the coordinator.

Assessment:

Students Assessment through CIE (80%) + SEE (20%)

| | | Total | 100 |

1.1 Course Objectives:

The Mini Project being part of the course work is not only a mechanism to demonstrate the abilities and specialization but also provides the opportunity to demonstrate originality, teamwork, inspiration, planning and organization in a software project. One can put into practice the techniques that have been taught throughout the previous courses. Mini-projects develop practical skills in students. The idea is to propose a problem that one might encounter in future career (be it in academia, industry, or government). Then propose a solution and implement it.

E-commerce Objectives:

Most business houses are shifting their operations to the online world. Right from buying apparels to computers to booking tickets and renting out apartments, everything can be done through the Internet now. It is a win-win formula for both the customers and the business houses. Digital India aims to boost E-business and the E-commerce industry with the vision that it would in turn boost the economy as a whole.

Multilingual Objectives:

Language is an essential driver of enterprise growth. The user interface is the key component of any application that needs to support various language speaking audiences. Making an app that appeals to and is available for more users broadens the market and brings more revenue in the app sales and there will be more exposure to the business.

- **Evaluation:** The project assessment is done by an evaluation team as per the schedule.

Linux Administration Practices

COURSE DESCRIPTION:

IT infrastructure consists of a set of physical devices and software applications that are required to operate the entire enterprise. IT infrastructure is also consists both human and technical capabilities. These services include the following- Computing platforms used to provide computing services, that connect employees, customers, and suppliers into a coherent digital environment, including servers ,Data management services that store and manage corporate data and provide capabilities for analyzing the data and Application software services that provide enterprise-wide capabilities such as enterprise resource planning, customer relationship management, supply chain management, and knowledge management systems that are shared by all business units. It allows an organization to deliver IT solutions and services to its employees, partners and/or customers and is usually internal to an organization and deployed within owned facilities.

OBJECTIVES

- Acquire comprehensive knowledge, technical expertise and hands-on experience in IT Infrastructure Management
- To learn all aspects of IMS such as Networking, Operating Systems, Virtualizations and Data Center technologies.

LAB REQUIREMENTS:

- A modern web-browser with HTML5 and JavaScript enabled.
- Remote Desktop Client connection software.
- Internet connectivity Microsoft Account (LiveID).

LIST OF EXERCISES

| # | Topics | ACTIVITY | WEIGHTAGE |
|----|---|---|-----------|
| 1. | Web Server | Apache Web Server, IIS Server: Install and Configure the Apache Web Server on Linux and IIS server on windows. | 10 |
| 2. | Samba Server | Implementation of Windows files and print services for Linux allowing the sharing of files and printers between Windows and Linux. | 10 |
| 3. | LDAP Server | LDAP Server: Lightweight Directory Access Protocol-Server Installation to access a directory service. | 10 |
| 4. | Mail Server | Mail Server configuration- POP3 Server, IMAP Server | 10 |
| 5. | Proxy Server | Develop a small web proxy server, which is able to cache web pages. It is a very simple proxy server which only understands simple GET-requests, but is able to handle all kinds of objects - not just HTML pages, but also images. | 10 |
| 6. | Firewalls and NAT (Network Address Translation) | Use of iptables to build a permissive firewall by selectively filtering packets based on protocol type. To demonstrate how addresses may be translated from private addresses to public and vice versa as they pass in and out of the firewall. | 20 |
| 7. | Cloud Infrastructure: Azure Hands-on Build your Infrastructure in the Cloud using Windows Azure Infrastructure Services - | <ol style="list-style-type: none"> 1. Login to the Windows Azure Management Portal, Define a new Windows Azure Affinity Group and Create a new Windows Azure Storage Account. 2. Register a DNS Server in Windows Azure. 3. Define a Virtual Network in Windows Azure. 4. Configure Windows Server Active Directory in a Windows Azure VM. 5. Configure New Machine for File Services in a Windows Azure VM. | 30 |

| Program: Master of Computer Applications | | Semester: III |
|--|---|-------------------------------|
| Course Title: DevOps | | Course Code: 22ECAE802 |
| L-T-P: 3-0-0 | Credits: 3 | Contact Hrs: 3 |
| ISA Marks: 50 | ESA Marks: 50 | Total Marks: 100 |
| Teaching Hrs: 40 | Exam Duration: 3 Hrs | |
| No | Content | Hrs |
| Unit I | | |
| 1 | Introduction to DevOps and Continuous Delivery Introducing DevOps, How fast is fast?, The Agile wheel of wheels, Beware the cargo cult Agile fallacy, DevOps and ITIL. | 3 Hrs |
| 2 | A View from Orbit : The DevOps process and Continuous Delivery – an overview : The developers, The revision control system, The build server, The artifact repository, Package managers, Test environments, Staging/production, Release management, Scrum, Kanban, and the delivery pipeline, Wrapping up – a complete example, Identifying bottlenecks. | 3 Hrs |
| 3 | How DevOps Affects Architecture Introducing software architecture, The monolithic scenario, The Twelve Factors, Architecture rules of thumb, The separation of concerns, The principle of cohesion, Coupling, Back to the monolithic scenario, A practical example, Three-tier systems, The presentation tier, The logic tier, The data tier, Handling database migrations, Rolling upgrades, Hello world in Liquibase, The changelog file, The pom.xml file, Manual installation, Microservices, Interlude – Conway's Law, How to keep service interfaces forward compatible, Microservices and the data tier, DevOps, architecture, and resilience. | 5 Hrs |
| 4 | Everything is Code The need for source code control, The history of source code management, Roles and code, Which source code management system? A word about source code management system migrations, Choosing a branching strategy, Branching problem areas, Artifact version naming, Choosing a client, Setting up a basic Git server, Shared authentication, Hosted Git servers, Large binary files, Trying out different Git server implementations, Docker intermission, Gerrit : a) Installing the git-review package, b) The value of history revisionism, The pull request model, GitLab. | 5 Hrs |
| Unit II | | |
| 5 | Building the Code Why do we build code? The many faces of build systems, The Jenkins build server, Managing build dependencies, The final artifact, Cheating with FPM, Continuous Integration, Continuous Delivery, Jenkins plugins, The host server, Build slaves, Software on the host, Triggers, Job chaining and build pipelines, A look at the Jenkins filesystem layout, Build servers and infrastructure as code, Building by dependency order, Build phases, Alternative build servers, Collating quality measures, About build status visualization, Taking build errors seriously, Robustness. | 3 Hrs |

| | | |
|---|---|--------------|
| 6 | Testing the Code Manual testing, Pros and cons with test automation, Unit testing, JUnit in general and JUnit in particular, A JUnit example, Mocking, Test Coverage, Automated integration testing, Docker in automated testing, Arquillian, Performance testing, Automated acceptance testing, Automated GUI testing, Integrating Selenium tests in Jenkins, JavaScript testing, Testing backend integration points, Test-driven development, REPL-driven development, A complete test automation scenario : Manually testing our web application, Running the automated test, Finding a bug, Test walkthrough, Handling tricky dependencies with Docker. | 3 Hrs |
| 7 | Deploying the Code Why are there so many deployment systems? Configuring the base OS, Describing clusters, Delivering packages to a system, Virtualization stacks: Executing code on the client, A note about the exercises, The Puppet master and Puppet agents, Ansible, Deploying with Chef, Deploying with SaltStack, Salt versus Ansible versus Puppet execution models, Vagrant, Deploying with Docker, Comparison tables, Cloud solutions, AWS, Azure. | 5 Hrs |
| 8 | Monitoring the Code Nagios, Munin, Ganglia, Graphite, Log handling, Client-side logging libraries, The ELK stack. | 5 Hrs |
| Unit – III | | |
| 9 | Issue Tracking What are issue trackers used for? Some examples of workflows and issues, What do we need from an issue tracker? Problems with issue tracker proliferation, All the trackers : Bugzilla, Trac, Redmine, The GitLab issue tracker, Jira. | 4 Hrs |
| 10 | The Internet of Things and DevOps Introducing the IoT and DevOps, The future of the IoT according to the market, Machine-to-machine communication, IoT deployment affects, software architecture, IoT deployment security, Okay, but what about DevOps and the IoT again?, A hands-on lab with an IoT device for DevOps. | 4 Hrs |
| Text Book: 1. Practical DevOps by Joakim Verona Publisher: Packt Publishing, Release Date: February 2016, ISBN: 9781785882876. | | |
| References: 1. Effective DevOps, Building a Culture of Collaboration, Affinity, and Tooling at Scale , By Jennifer Davis, Ryn Daniels, Publisher: O'Reilly Media, Release Date: June 2016 , Pages: 410. 2. DevOps Practice Exercise:

| SI NO. | TOPIC | ACTIVITY | WEIGHTAGE |
|--------|---|-----------------------------------|-----------|
| 1. | DevOps basics: Learn the origins of DevOps and the basic principles and techniques. | Lab Practice, Assignment and Quiz | 10 |
| 2. | AWS crash course: Hands-on session where you learn to use the most important AWS services, including IAM, EC2, ASG, EBS, ELB, S3, and RDS. | Lab Practice, Assignment and Quiz | 10 |
| 3. | Infrastructure as code: Overview of different techniques to manage infrastructure, including ad-hoc scripts (e.g., Bash, Python), configuration management tools (e.g., Chef, Puppet), machine images (e.g., VMs, Docker), and provisioning tools (e.g., Terraform, CloudFormation). | Lab Practice, Assignment and Quiz | 10 |
| 4. | Terraform introduction: Go through a series of coding exercises that cover the basic Terraform syntax, state management, loops, conditionals, lifecycle management, and common gotchas. | Lab Practice, Assignment and Quiz | 10 |
| 5. | Advanced Terraform: Go through a series of coding exercises that cover Terraform modules, file layout, keeping code DRY, team workflows, and automated testing. | Lab Practice, Assignment and Quiz | 10 |
| 6. | Immutable infrastructure: Overview of immutable infrastructure practices, versioning artifacts, promoting artifacts through environments, and deployment. | Lab Practice, Assignment and Quiz | 10 |
| 7. | Packer introduction: Build your own AMIs and other virtual machine images using Packer. Docker introduction: Create your own Docker images and deploy them using Docker orchestration tools. | Lab Practice, Assignment and Quiz | 10 |
| 8. | DevOps best practices: Learn about continuous integration, micro services, feature toggles, canary deployments, monitoring, alerting, and log aggregation. | Lab Practice, Assignment and Quiz | 10 |
| 9. | Production readiness review: A Gruntwork engineer goes through a checklist of questions with your team to see what work you need to do to be ready for prod. Architecture deployment: Deploy your customized Reference Architecture in AWS. | Lab Practice, Assignment and Quiz | 10 |

| | | | |
|--------------|--|-----------------------------------|------------|
| 10. | Migrating to the new architecture: Learn the process of migrating your apps and data to the new architecture. | Lab Practice, Assignment and Quiz | 10 |
| Total | | | 100 |

| Sl.No | Activity | Weightage |
|-------|---|-----------|
| 1 | Find two examples of user interfaces (might be desktop software, web applications, smartphone apps, consumer devices, car dashboards, building entrances, traffic intersections, shower controls, etc), one that you consider a good design and one that you consider a bad design. For each interface, you should: <ul style="list-style-type: none"> • Describe its purpose for intended users. • Analyze its good and bad points of usability with reference to all the dimensions of usability (learnability, visibility, efficiency, errors) Illustrate your analysis with appropriate screenshots or photographs. | 5 |
| 2 | Design a user interface for a specific task that communicates its conceptual model to the user more effectively, so that users are less likely to make this mistake. Sketch your ideas (alternate designs) on a whiteboard. Critique it, and update the designs. | 5 |
| 3 | Guided by the categories below, make a list of what needs to be made visible, and then brainstorm (and sketch) how the interface might make it visible. | 5 |

| | | |
|----|---|----|
| | <ul style="list-style-type: none"> • Actions: what can the user do? • State: what is the current state of the system? • Feedback: what was the effect of the user's actions | |
| 4 | <p>Explore the undo models used in single-user text editing. Choose a few different kinds of textboxes. Experiment with a web browser's undo model for text editing by typing, deleting, changing properties, and using Undo. Try to figure out:</p> <ul style="list-style-type: none"> • How many undo streams are there—one, or many? • How is the history divided into undoable units? • How much previous state is recovered when you undo? (Selections? cursor positions?) • What visible feedback does Undo give? (e.g., if the Undo affects a location scrolled out of the box?) | 5 |
| 5 | User-centered design process, by conducting a lightweight UCD process on a few problems in the classroom. | 10 |
| 6 | User Analysis, Task Analysis, Domain Analysis by observing a real environment of people working. | 10 |
| 7 | Designing UIs by sketching. | 10 |
| 8 | Exploring some of the main structuring patterns of GUI software: the view tree, listeners, and model-view-controller using HTML, Javascript, and jQuery, along with a handy online HTML editor. | 10 |
| 9 | Explore low-fidelity prototyping by creating a simple, hand-drawn prototype in less than 5 minutes, and simulating it with another user. | 10 |
| 10 | Information visualization by experimenting with modifications to an existing visualization using a browser. | 10 |
| 11 | Exploring some of the principles and pitfalls of color design and typography. | 10 |
| 12 | Heuristic evaluation of an e-commerce web site. Record the usability problems found. Justify every observation by naming one or more usability heuristics (design principles) that it violates. Assign a severity rating to each problem (cosmetic, minor, major, or catastrophic). Include at least one positive usability comment, again justifying it by naming one or more heuristics. | 10 |

| A student must carry out a project on any domain using cutting edge technologies and demonstrate the same at the end of the semester. | | |

IV Semester MCA- Elective Courses (MOOC)

| Program: Master of Computer Applications | | Semester: IV |
|---|--|-------------------------------|
| Course Title: Deep Learning | | Course Code: 22ECAE809 |
| L-T-P: 2- 0-0 | Credits: 2 | Contact Hrs: 2 |
| ISA Marks: 100 | ESA Marks: 00 | Total Marks: 100 |
| Teaching Hrs: 40 | Exam Duration: | |
| No | Content | Hrs |
| Unit I | | |
| 1 | Deep Learning Intuition Introduction to deep learning, Neural Network Basics, Batch Normalization in Neural Networks. | 3 Hrs |
| 2 | Adversarial Examples and Generative Adversarial Networks Attacking neural networks with Adversarial Examples and Generative Adversarial Networks, Shallow Neural Networks, Key concepts on Deep Neural Networks, Building your Deep Neural Network: step by step, Deep Neural Network – Application. Explaining and Harnessing Adversarial Examples, Generative Adversarial Nets, Conditional GAN, Super-Resolution GAN, CycleGAN. | 7 Hrs |
| 3 | Improving Deep Neural Networks: Hyperparameter tuning, Regularization and Optimization Practical aspects of deep learning, Optimization algorithms, Initialization, Regularization, Gradient Checking, Optimization, Hyperparameter tuning, Batch Normalization, Programming Frameworks. | 6 Hrs |
| Unit II | | |
| 4 | Convolutional Neural Networks A guide to convolution for deep learning, The basics of ConvNets, Deep convolutional models, Visualizing and Understanding Convolutional Networks, Deep Inside Convolutional Networks: Visualizing Image Classification Models, Understanding Neural Networks Through Deep Visualization. <ul style="list-style-type: none"> Convolutional Model: application Keras Tutorial Residual Networks. | 8 Hrs |
| 5 | Interpretability of Neural Networks Detection Algorithms, Special Applications: Face Recognition & Neural Style Transfer, Dropout: A Simple Way to Prevent Neural Networks from Overfitting, DenseNet: Densely Connected Convolutional Networks. | 8 Hrs |
| Unit – III | | |
| 6 | Recurrent Neural Networks : Deep Reinforcement Learning Introduction to Recurrent Neural Network, Building a Recurrent Neural Network - Step by Step | 8 Hrs |

- Character-level Language Modeling
- LSTM
- Natural Language Processing and Word Embeddings
- Sequence Models and Attention Mechanism
- Operations on Word Vectors - Debiasing
- Emojify!
- Neural Machine Translation with Attention
- Trigger Word Detection

WEB CONTENT MANAGEMENT SYSTEM – COURSE PROJECT

COURSE DESCRIPTION:

Today, many web publishers use content management systems (CMS) to allow them to instantly and dynamically update web pages and properties as new content becomes available so that every visit to a site is engaging, informative, and meaningful. The course project shall explore any one of the three most popular open source web-based content management systems—**WordPress, Joomla, and Drupal**—to create dynamic and flexible websites and landing pages. Students shall explore the fundamentals of planning dynamic websites, CMS database management, developing CSS-controlled site templates, and creating database-driven websites through the planning and creation of their own topic-based sites.

OBJECTIVES

- Introduce learners to any one of the three most popular open source content management systems (CMS) such as WordPress, Drupal, or Joomla.
- Create, deploy and Maintain websites using CMS, including creating and editing content, adding functionality, and creating custom templates and themes.

COURSE PROJECT TITLE: BUILDING WEBSITE USING CMS (JOOMLA / WORDPRESS OR DRUPAL)

To build website for any real world examples such as Corporate web sites or portals, Online magazines, newspapers, and publications, E-commerce and online reservations, Government applications, Small business web sites, Community-based portals, School, religious web sites or Personal or family homepages using popular Web Content Management System. The website shall facilitate to create, manage, store and deploy content on the Web, including text, graphics, video or audio as a part of Enterprise Content Management.

EXECUTION PLAN:

| Sl.No | Demonstration | Implementation | Weightage |
|-------|--|---|-----------|
| 1. | Introducing Content Management Systems <ul style="list-style-type: none"> ○ An overview of some of the different tools and methods that today's web publishers are using to create highly-tailored dynamic web content. ○ Purchasing and configuring a domain name and web hosting. | 1. Introduction to Joomla & Installation 2. Domain Name Registration & Configuration and Hosting 3. Create a Database 4. Content Preparation and Planning | 20 |

| | | | |
|----|--|--|----|
| 2. | Introduction to Joomla <ul style="list-style-type: none"> ○ Explore the CAM model (Categories, Articles, and Menus) approach to creating content for Joomla environments. ○ Administration and management of users and media. ○ Installing Joomla ○ Exploring the Admin Interface ○ Content creation using the CAM model ○ Content customization: images, video, audio, tags, formats, etc. | <ol style="list-style-type: none"> 1. Write an article & put your articles in order with categories. 2. Customize Administrator's Panel 3. Change your website's look with Templates. 4. Expand your website's functionality with different extensions. 5. Content creation & Customization using the CAM model | 20 |
| 3. | Joomla Menus <ul style="list-style-type: none"> ○ Creating and controlling menus for Joomla site. ○ To link to articles and create special menu items. ○ Adding and displaying menus ○ Linking menus to articles and other features | <ol style="list-style-type: none"> 1. Categorize the articles which allow grouping your content better. 2. Create menu items for website. | 20 |
| 4. | Extending Joomla –Plug-ins, Modules <ul style="list-style-type: none"> ○ Use of Joomla, Plug-ins, Modules, Components and other extensions. ○ Installation of extensions, Finding and adding Joomla extensions ○ Adding and setting up 2 “big” extensions (choose blog, calendar, image gallery, Paypal-based shopping cart, or portfolio. Other extensions on approval) | Select Create Joomla Modules for the website such as Feed Display Module, Footer Module, Latest News Module, Search Module, Random Image Module, Who's Online Module etc. | 20 |

| | | | |
|----|---|--|----|
| 5. | Custom Templates <ul style="list-style-type: none"> ○ Explore the addition of creation and uses of customized Joomla templates ○ Modifying templates using CSS and HTML tricks. | Select and Customize template for website. | 20 |
| 6. | User management and permissions <ul style="list-style-type: none"> ○ Explore how to manage users in Joomla site, including managing who sees what based on login, as well as who can do what based on permissions assigned. | Control the use of Captcha, registration allowed and type of registration, default user group new users, reset password, and new user registration email notice to administration. | 20 |

Evaluation Scheme

3. In Semester Assessment (ISA)

| Assessment | Marks |
|--------------|------------|
| ISA | 100 |
| ESA | --- |
| Total | 100 |

[BACK](#)

| Program: Master of Computer Applications | | Semester: IV |
|---|--|-------------------------------|
| Course Title:-Big Data Analysis with Scala and Spark | | Course Code: 22ECAE817 |
| L-T-P: 2-0-0 | Credits: 2 | Contact Hrs: 2 |
| ISA Marks: 100 | ESA Marks: 00 | Total Marks: 100 |
| Teaching Hrs: 40 | Exam Duration: | |
| No | Content | Hrs |
| Unit I | | |
| 1 | Getting Started – Introduction Introduction to Apache Spark, Installing softwares, Scala Basics, Flow Control in Scala, Functions in Scala, Data Structures in Scala | 4 Hrs |
| 2 | Using Resilient Distributed Datasets (RDDs) The Resilient Distributed Dataset, Ratings Histogram Example, Preview, Key / Value RDD's, and the Average Friends by Age example, Running the Average Friends by Age Example, Filtering RDD's, and the Minimum Temperature by Location Example, Running the Minimum Temperature Example, and Modifying it for Maximum, Counting Word Occurrences using Flatmap(), Improving the Word Count Script with Regular Expressions, Sorting Word Count Results – Find the Total Amount Spent by Customer | 7 Hrs |
| 3 | SparkSQL, Datasets and Dataframes Introduction to SparkSQL, Using SparkSQL, Using DataSets, Implement the "Friends by Age" example using DataSets, Exercise Solution: Friends by Age, with Datasets, Word Count example, using Datasets, Revisiting the Minimum Temperature example, with Datasets, Implement the "Total Spent by Customer" problem with Datasets | 5 Hrs |
| Unit II | | |
| 4 | Spark Programs Examples Find the Most Popular Movie, Use Broadcast Variables to Display Movie Names, Find the Most Popular Superhero in a Social Graph, Find the Most Obscure Superheroes, Solution: Find the Most Obscure Superheroes, Superhero Degrees of Separation: Introducing Breadth-First Search, Superhero Degrees of Separation: Accumulators, and Implementing BFS in Spark, Superhero Degrees of Separation: Review the code, and run it. Item-Based Collaborative Filtering in Spark, cache(), and persist() | 5 Hrs |
| 5 | Running Spark on a Cluster Using spark-submit to run Spark driver scripts, Packaging driver scripts with SBT, Package a Script with SBT and Run it Locally with spark-submit, Introducing Amazon Elastic MapReduce, Partitioning, Best Practices for Running on a Cluster, Troubleshooting, and Managing Dependencies | 5 Hrs |
| 6 | Machine Learning with Spark ML Introducing MLLib, Using MLLib to Produce Movie Recommendations, Linear Regression with MLLib, Predict Real Estate Values with Decision Trees in Spark | 6 Hrs |
| Unit – III | | |

| | | |
|----------|---|--------------|
| 7 | Introduction to Spark Streaming The DStream API for Spark Streaming, Real-time Monitoring of the Most Popular Hashtags on Twitter, Structured Streaming, Using Structured Streaming for real-time log analysis, Windowed Operations with Structured Streaming | 4 Hrs |
| 8 | Introduction to GraphX GraphX, Pregel, Breadth-First-Search with Pregel, Using the Pregel API with Spark GraphX, Superhero Degrees of Separation using GraphX | 4 Hrs |

Reference Books

Lab Practices Plan

| Sl.No | Topic | Number of slots |
|-------|---|-----------------|
| 1 | Data preprocessing on a given dataset. | 2 |
| 2 | Demonstration of quartiles using FIVE-number summary on a given dataset. | 2 |
| 3 | Designing Star, Snowflake, and Fact Constellation Schema for a given Data Warehouse problem. | 2 |
| 4 | Demonstration of Association rule process on a given dataset using Apriori algorithm and FP-growth algorithm. | 2 |
| 5 | Demonstration of classification rule process on a given dataset using Decision tree algorithm. | 2 |
| 6 | Demonstration of classification rule process on a given dataset using Naïve Bayes algorithm. | 2 |
| 7 | Demonstration of prediction on given dataset using regression techniques | 2 |
| 8 | Demonstration of data visualization on a given dataset. | 2 |
| 9 | Demonstration of clustering on a given dataset using K-Means algorithm. | 2 |
| 10 | Case study on web mining and text mining. | 2 |

Evaluation Scheme

4. In Semester Assessment (ISA)

| Assessment | Marks |
|------------|-------|
| ISA | 100 |
| ESA | --- |
| Total | 100 |

[BACK](#)

| Program: Master of Computer Applications | | Semester: IV |
|---|---|-------------------------------|
| Course Title:-AI for Every One | | Course Code: 22ECAE818 |
| L-T-P: 2-0-0 | Credits: 2 | Contact Hrs: 2 |
| ISA Marks: 100 | ESA Marks: 00 | Total Marks: 100 |
| Teaching Hrs: 40 | Exam Duration: -- | |
| No | Content | Hrs |
| Unit I | | |
| 1 | Introduction to AI Welcome to AI experience, Machine Learning, what is data? The terminology of AI, what makes an AI company, what machine learning can and cannot do, more examples of what machine learning can and cannot do, Non-technical explanation of deep learning | 4 Hrs |
| 2 | Building AI Projects Workflow of a machine learning project, Workflow of a data science project, Every job function needs to learn how to use data, How to choose an AI project (Part 1), How to choose an AI project (Part 2), Working with an AI team, Technical tools for AI teams (optional) | 6 Hrs |
| 3 | Demystify AI : Deep Learning What is Deep Learning, Deep Learning vs Statistical Machine Learning: When to use What?, Credits Scoring to ChatGPT: Overview of Neural Network Architectures, Tooling for Deep Learning, Bank Employee To AI Engineer: Transition Story, Task: Get Engagement by Sharing an AI Learning Resource, Takeaways & Jargons | 6 Hrs |
| Unit II | | |
| 4 | AI/ML Project Life Cycle Requirements and Scope of Work, Data Collection, Data Preparation & Exploratory Data Analysis, Feature Engineering, Model Selection & Training, Model Evaluation Metrics, Model Evaluation Metrics: When to use which Metric?, Model Fine Tuning, Model Deployment, Deployment & Monitoring Using ML Ops, Online Credibility: Engage Meaningfully, AI Influencers List 2024, Task: Post About AI/ML Project Steps, Takeaways & Jargons | 8 Hrs |
| 5 | Building AI in Your Company Case study: Smart speaker, Case study: Self-driving car, Example roles of an AI team, AI Transformation Playbook, AI Transformation Playbook, AI pitfalls to Taking your first step in AI, Survey of major AI application areas, Survey of major AI techniques (optional) | 8 Hrs |
| Unit – III | | |
| 6 | AI and Society A realistic view of AI, Discrimination / Bias, Adversarial attacks on AI, Adverse uses of AI, AI and developing economies, AI and jobs, Conclusion | 4 Hrs |

| | | |
|--|---|--------------|
| 7 | Industry Case studies Text Classification: Support Ticket Prioritization, Image Classification: Crop Yield Detection, RAG-Based Gen AI: ChatGPT for Private Organizational Data, Chatbot: Food Delivery Chatbot, LLM Powered Real Estate Chatbot, Recommendation System: Book Recommendations, Task: Build a Case Study on a Company that leverages AI, Takeaways & Jargons | 4 Hrs |
| Text Book: “AI for Everyone: A Beginner's Handbook for Artificial Intelligence, Saptarshi Goswami Pearson, 2022. | | |
| | | |
