

Centre for Engineering Education Research

## Engineering Education Innovations @ KLE Tech

“Engineering Exploration” course is a unique innovation born in the educational ecosystem of KLE Tech. This first-year course is co-designed and team-taught by faculty from multiple engineering disciplines. It focuses on problem solving, engineering design, multi-disciplinary skills, ethics and sustainability. The course follows PBL pedagogy. Students work in teams to solve identified problems. **Prayog Vasant** is an exhibition of students’ projects. It is conducted in last week of spring semester and it serves as a platform for peer learning and celebration of students’ success.
